# DROP FORGED TURNBUCKLES

(Class 3)

(Class 2)

Turnbuckles meet the performance requirements of Federal Specifications F1145 and ASTM FF-T-791B, Type 1 Form 1

Diameter & Take-up Dimensions A x C	Body Only						Body and Stubs				Working Load Limit in Lbs.

Maximum load ratings are based on a straight vertical lift in a gradually increasing manner. Any deviations as angular lifts, shock loads, modification of the basic part, etc., will result in drastically reduced maximum loads.

# DROP FORGED TURNBUCKLES

Turnbuckles meet the performance requirements of Federal Specifications F1145 Type 1 Form 1 and ASTM FF-T-791B.

- Meets or exceeds all requirements of ASME B30.26 including identification, ductility, design factor, proof load and temperature requirements.
- Material traceability available through Product Identification Code (PIC) System

Available with hot galvanized or self-colored finish.

(Class 4)

(Class 8)

(Class 7)

Available with hot galvanized or self-colored finish. Jaw types supplied with round pins and cotter keys unless nuts and bolts are specified. Locking nuts are also available.

Eye, Jaw and Hook fittings are heat treated.

# MIDGET TURNBUCKLES

All sizes and types available with sand cast Aluminum bodies, hex heads and zinc plated steel hooks or eyes. Cast malleable iron bodies, zinc plated also available with zinc plated fittings only in sizes denoted. Standard package quantity – 10 pieces. When ordering specify Aluminum or Malleable iron.

# DROP FORGED ANCHOR SHACKLES

Size, working load limit, and trademark are permanently marked on all shackles. All shackles and pins are heat treated. Loads are based on a design factor of 6 to 1, except (\*\*) which is 5 to 1. When tested all shackles are pulled at a uniform rate of speed in a direct tension.

- Meets or exceeds all requirements of ASME B30.26 including identification, ductility, design factor, proof load and temperature requirements.
- Material traceability available through Product Identification Code (PIC) System

Shackles Meet Performance Requirements of Federal Specifications RRC-271F Type IVA\* Grade A

All types of shackles are available in a self-colored or hot galvanized finish. When ordering specify the size, finish, and type of shackle. Other rust preventative coatings are available on a special basis.

Bolt type shackles are of the same specifications as the regular types except for the bolt, nut and cotter.

### WARNING:

Any deviations such as angular lifts, shock loads, modification of the basic forging, etc., will result in drastically reduced working load limits.

# DROP FORGED WIRE ROPE CLIPS

“CHICAGO” the Trade-Mark of quality in wire rope fittings is on all forged steel clip bases. This identification symbolizes wire rope clips that are manufactured to rigid specifications. Component parts are galvanized. U-bolts, with or without nuts, prices on application.

- Meets performance requirements of federal specification FF-C-450, Type 1, Class1.
- Meets or exceeds all requirements of ASME B30.26 including identification, ductility, design factor, proof load and temperature requirements.

Efficiency rating of a properly applied termination is 80% for 1/8" through 7/8" and 90% for sizes 1" through 1-1/2".  
Should be used in heavy duty applications

## RECOMMENDED APPLICATION FOR CHICAGO DROP FORGED WIRE ROPE CLIPS

Clip Size Inches	Minimum No. of Clips	Amount of Rope to Turn Back in Inches	Torque in Ft. Lbs.
1/8"	2	3-1/4"	4.5
3/16"	2	3-3/4"	7.5
1/4"	2	4-3/4"	15
5/16"	2	5-1/4"	30
3/8"	2	6-1/2"	45
7/16"	2	7"	65
1/2"	3	11-1/2"	65
9/16"	3	12"	95
5/8"	3	12"	95
3/4"	4	18"	130
7/8"	4	19"	225
1"	5	26"	225
1-1/8"	6	34"	225
1-1/4"	7	44"	360
1-1/2"	8	54"	360

1. The correct way to attach wire rope clips is illustrated above. Apply the first clip one base width from the dead end of the wire rope. The base or saddle should bear on the live end of the rope – U-bolt on the short end. Tighten nuts firmly.

2. Attach second clip as close to loop as possible. Tighten nuts but not firmly.

3. Attach balance of clips spaced equally between first two clips. Tighten all nuts completely. Apply initial load – inspect nuts and retighten. Inspect all clips periodically.

The number of clips shown is based on using right regular or Lang lay wire rope, 6x19 class or 6x37 class, fibre core IWRC, IPS or XIPS. The number of clips shown also applies to right regular lay wire rope, 8x19 class and 18x7 class, fibre core, IPS or XIPS, sizes 1-1/2-inch and smaller.

If Seale construction or similar large outer wire type construction in the 6x19 class is to be used for sizes 1-inch and larger, add one additional clip. For other classes or wire rope not mentioned, it may be necessary to add additional clips to the number shown. If more clips are used than shown, amount of rope turn back should be increased proportionately.

# CHICAGO GRIP CLIP

- Product Identification Codes (PIC Code), product size, and "CHF" are forged into each base.
- Meets performance requirements of federal specification FF-C-450, Type 3, Class1.
- Chicago grip clips have an 80% efficiency rating when proper application instructions followed.
- Forged with a single piece design and used in pairs with heavy duty nuts.
- Meets or exceeds all requirements of ASME B30.26 including identification, ductility, design factor, proof load and temperature requirements.

Size	Min. No. of Clips	Rope Turn Back (in.)	Torque (ft/lbs)
5/16"	2	5	30
3/8"	2	5.5	45

Size	Part No.	A	B	C	D	E	Weight Per 100 (lbs)
5/16"	71820 2	1.41	1.84	0.41	1.09	0.38	28
3/8"	71823 3	1.72	2.70	0.50	1.13	0.40	40

## CHICAGO GRIP CLIP APPLICATION INSTRUCTIONS

- Match the same Grip Clip Size to the Wire Rope Size
- Do Not mismatch with other manufacturers wire rope clips
- Do not use on plastic coated ropes

Efficiency ratings for wire rope terminations are based upon the minimum breaking strength of wire rope. The efficiency rating of a properly prepared termination of clip sizes 5/16" or 3/8" is 80%.

### Application Information

1. Refer to table above in for application instructions. Turn back specified amount of rope from loop or thimble. Apply first clip one base width from dead end of wire rope. Use torque wrench to tighten nuts evenly, alternating from one nut to the other of the same clip until reaching the recommended torque. (See Figure 1)
2. Apply the second Grip Clip as near the loop or thimble as possible. Turn nuts to firm and then use torque wrench to tighten nuts on the clip evenly, alternating from one nut to the other on the second clip making sure that the recommended torque is met. (See Figure 2)
3. Apply first load to test the assembly. The load should be of equal to or greater weight than loads expected in use. Follow up applying the load with using a torque wrench to again check that the nuts are torqued to the recommended values in the above table.
4. As with all good rigging practice, the wire rope termination should be inspected periodically for wear, abuse and general adequacy.

## WARNING

- Read and understand instructions prior to usage
- Failure to read, understand, and follow instructions may lead to death or serious injury.
- Apply first load to test assembly. This load should be greater than or equal to the weight of expected loads.

# DROP FORGED EYE BOLTS

Regular (pg 14), shoulder (pg 15) and screw thread (pg. 17) drop forged heat treated steel eye bolts supplied as standard with hot galvanized finish. Machine thread eye bolts are threaded National Coarse before galvanizing and assembled with hex nuts tapped oversize. Regular Nut Eyebolts and Shoulder Nut Eyebolts loads are based on in-line loads with a design factor of 5 to 1. When tested all eye bolts are pulled at a uniform rate of speed in a direct tension.

## REGULAR – MACHINE THREAD

- Meets or exceeds all requirements of ASME B30.26 including identification, ductility, design factor, proof load and temperature requirements.
- Material traceability available through Product Identification Code (PIC) System

### WARNING:

Any deviations such as angular lifts, shock loads, modification of the basic forging, etc., will result in drastically reduced working load limits.

Special shank and thread lengths are also available.

Some sizes also available in Stainless Steel. See pg. 41.

NOTE: Hex Nuts are imported

# DROP FORGED EYE BOLTS

**MACHINE THREAD** (As noted on page 14)

- Meets or exceeds all requirements of ASME B30.26 including identification, ductility, design factor, proof load and temperature requirements.
- Material traceability available through Product Identification Code (PIC) System

**WARNING:**

Any deviations such as angular lifts, shock loads, modification of the basic forging, etc., will result in drastically reduced working load limits.

NOTE:  
Hex Nuts are imported

† Loads are based on a design factor of 5 to 1. Some sizes also available in Stainless Steel. See page 41. Special shank and thread lengths are also available.

# DROP FORGED \*RING BOLTS

Ring bolts are only available in hot galvanized finish. Eye bolts are drop forged steel; eye bolt specifications are identical to those shown on pages 14-15. Ring dimensions are shown in table below. **RING BOLTS ARE NOT TO BE USED FOR LIFTING APPLICATIONS.**

## REGULAR – MACHINE THREAD

# MACHINERY EYE BOLTS

Maximum blank lengths, either pattern indicated in column (1). Vertical loads are based on a design factor of 5 to 1. Variation in quantity: on special items we reserve the right to a maximum 10% variation for allowances in manufacture. Finishes include zinc plated, hot galvanized and black oxide.

- Meets or exceeds all requirements of ASME B30.26 including identification, ductility, design factor, proof load and temperature requirements.
- Material traceability available through Product Identification Code (PIC) System

11	31	1-1/8"-7	2-3/4"	2"	4"	6-3/4"	7-1/2"	2-3/4"
12	32	1-1/4"-7	3"	2-3/16"	4-7/16"	7-7/16"	8-1/2"	3"
14	34	1-1/2"-6	3-1/2"	2-1/2"	5-3/16"	8-11/16"	9-1/2"	3-1/2"

Working load limits for eye bolts are based on a straight vertical lift in a gradually increasing manner. Angular lifts will significantly lower working load limits (see Shoulder Pattern) and should be avoided whenever possible. If an angular lift is required, a properly seated Shoulder Pattern eye bolt must be used. Loads should always be applied to eye bolts in the plane of the eye, not at an angle to this plane. Angular lifts must never be more than a 45° pull. For angular lifting see chart below.

Diameter and Thread	Working Load Limit	
	Straight Pull (X)	45° Pull (Y) Shoulder Only
1/4"-20	500	125
5/16"-18	900	225
3/8"-16	1400	350
7/16"-14	2000	500
1/2"-13	2600	650
9/16"-12	3200	800
5/8"-11	4000	1000
3/4"-10	6000	1500
7/8"-9	7000	1750
1"-8	9000	2250
1-1/8"-7	12000	3000
1-1/4"-7	15000	3750
1-1/2"-6	21000	5250

Plain Pattern

Shoulder Pattern

**ANGULAR LIFTS SHOULD BE AVOIDED WHENEVER POSSIBLE.**

# MACHINERY EYE BOLTS

Drop forged steel. Heat treated after forging. Self-colored, zinc plated, or hot galvanized. Plain or shoulder type, blank or threaded. Threaded will be supplied unless otherwise specified. See additional specifications and dimensions on page 18.

- Meets or exceeds all requirements of ASME B30.26 including identification, ductility, design factor, proof load and temperature requirements.
- Material traceability available through Product Identification Code (PIC) System

# PLATED MACHINERY EYE BOLTS

- Meets or exceeds all requirements of ASME B30.26 including identification, ductility, design factor, proof load and temperature requirements.
- Material traceability available through Product Identification Code (PIC) System

## ZINC PLATED

### PLAIN PATTERN – ZINC

# ALLOY STEEL SWIVEL HOIST RINGS

Swivel Hoist Rings have full swivel and pivot action and are the ideal product for angular lift applications. They are alloy steel with a black oxide finish and they adhere to the same rigid quality standards that have been a part of Chicago Hardware's proud tradition since 1912. Individually proof tested and magnetic particle inspected. From 800 to 24,000 lb load capacities (Rated at 5:1 design factor).

Part No.	Thread Size (A)	Working Load Limit	Thread Length (C)	B	D	E	F	G	H	Torque

- Meets or exceeds all requirements of ASME B30.26 including identification, ductility, design factor, proof load and temperature requirements.
- Material traceability available through Product Identification Code (PIC) System

**WARNING: DO NOT EXCEED SAFE WORK LOAD**

## DROP FORGED LIFTING EYES

Drop forged from C-1035 steel, heat treated. Available blank or threaded. Self-colored finish is standard; hot galvanized or other finishes supplied on a special basis. Used in lifting applications where larger eyes are required. When ordering prefix stock number with letter "B" (blank) or "T" (threaded) as required. Loads are based on a design factor of 5 to 1. Working loading limits for lifting eyes are based on a straight vertical lift in a gradually increasing manner, and should never be used for angular lifts.

# DROP FORGED EYE NUTS

Stock Eye Nuts listed below, other than Blanks, are drilled and tapped standard regardless of finish. Both types drilled only, with special tapping or finish supplied to specification. Loads are based on a design factor of 5 to 1. Blanks are self-colored.

**NOTE:** Loads shown apply to Eye Nuts only, based on a vertical pull, and not to any connecting bolt or stud.

- Meets or exceeds all requirements of ASME B30.26 including identification, ductility, design factor, proof load and temperature requirements.
- Material traceability available through Product Identification Code (PIC) System

- Forged from carbon steel suitable for welding.
- Supplied with self-colored finish.
- Reference American Welding Society specifications for proper welding procedures.
- \*Not including draft.

# BLACK OXIDE MACHINED ROD ENDS

Drop forged. Listed diameters, lengths, thread lengths and hole sizes carried in stock. Drilling, threading, other machining and plating furnished to specification.

NOTE: Average properties of 1035 natural hot rolled steel 75/85,000 lbs. P.S.I. tensile, 40/55,000 lbs. P.S.I. yield.

# ROUND BEND U-BOLTS

Round Bend U-Bolts for Steel or Wrought Iron pipe sizes 1/4"-18" inclusive, are produced from low carbon steel and supplied with NC rolled threads and two (2) hex nuts (hex nuts are imported). In addition, U-Bolt plate is available if required. Zinc plated, hot galvanized and black oxide finishes are standard. Other types of coatings or self-colored available on a special basis. Round, Square or "V" type U-Bolts to 1" diameter manufactured to specifications in both ferrous and non-ferrous metals.

# ZINC PLATED TURNED EYE BOLTS

Turned eye bolts are manufactured from low carbon cold drawn steel wire and are supplied with NC rolled machine threads with one hex nut unassembled. Zinc plated finish is standard; other types of coating or self-colored available on a special basis. When it is not feasible to utilize a standard eye bolt, we can manufacture to your specifications.

## MACHINE THREAD

NOTE:  
Hex Nuts  
are imported

Some sizes  
also available in  
Stainless Steel.

# ZINC PLATED TURNED EYE BOLTS

## LAG THREADS

Lag Screw threaded Turned Eye Bolts are comparable in steel specification, finish and packaging to machine thread Turned Eye Bolts listed on page 35. Lag screw threads are rolled to fit standard anchors and shields and supplied with gimlet point.

Stock No.	Part No.	Dimensions – Inches					Weight Per 100 in lbs.

National Coarse Right Hand Thread. For joining threaded rods where span of application exceeds 144" or where a threaded fitting is used with threaded rod in suspension applications.

\* Also available in self-colored finish for welding.

### ROUNDS

Diameter or Size	Color Code	Part No.	Length Inches	Est.Wt Per 100 Ft. (lbs)
3/16"	Green	28105 8	36"	9.4
1/4"	Blue	28110 2	36"	16.7
5/16"	Red	28115 7	36"	26.1
3/8"	Yellow	28120 1	36"	37.6
7/16"	Green	28125 6	36"	51.1
1/2"	Blue	28130 0	36"	66.8
5/8"	Red	28135 5	36"	104.3
3/4"	Yellow	28140 9	36"	150.2
7/8"	Green	28145 4	36"	204
1"	Red	28150 8	36"	267

Some sizes are available in stainless steel on a special basis.

Diameters 3/16" to 3/4" inclusive are cold drawn steel. Produced to cold finish tolerances. 7/8" and 1" rounds are Hot Rolled. 72", 120" and 144" lengths are also available.

# ZINC PLATED MILD STEEL "SHAPES"

Special lengths available upon request.  
 \*\* Also available in self-colored finish for welding.

are imported

See page 34 for additional dimensional information.

# FORMED OR FORGED FITTINGS

The schematic drawings in adjoining columns represent basic rod or wire forms and steel eye bolt forgings. Space does not permit the design illustrations of all parts that we are capable of manufacturing.

A review of complete catalog literature will indicate an extensive listing of standard stock sizes of round bend U-bolts, turned or formed eye bolts and forged steel eye bolts in several patterns.

When it is not feasible to utilize a standard product, we are prepared and equipped to manufacture requirements to specification. Inquiries are solicited.

Variation in quantity: on special items we reserve the right to a maximum 10% variation for allowances in manufacture.
