

Acid EaterTM

ABSORBER & NEUTRALIZER

BENEFITS

- Contains, absorbs and neutralizes hazardous acid spills in a safe and cost-effective manner.
- Pellet formula absorbs more and requires less clean up.
- Safe, fast-acting and easy to use.
- Neutralizes a variety of acids and acidic products.
- Does not create hazardous dust clouds or leave residues like caustic soda and sodium biocarb.
- Complies with OSHA Regulation 1910.178(g). *Facilities must have means to neutralize spilled acid.*
- USDA-approved; safe to use in a variety of settings.
- Eliminates disposal costs and safety concerns because it is land-fill disposable.
- Biodegradable, environmentally safe and non-hazardous.

PRODUCT PROCEDURES

Wear and use all personal safety equipment at all times during and after spill clean-up.

Pour a dike or barrier around the edges of the spill to contain it.

Slowly pour from the outside of the spill inward.

Continue working from the outside of the spill inward, until the liquid is completely covered.

Prepare the disposal bags. Gently sweep up the material and place in the disposal bags.

Dispose of properly according to Regulations in your area.
