The DeWitt Difference

One Company. One Call. Over 600 Products!

Larry DeWitt — Founder & CEO

From the Desk of Larry DeWitt

There is no better industry than the lawn & garden industry. It is comprised of ethical, hard-working families that work every day to create a better tomorrow. We strive to support and protect the environment while also supporting and protecting our own families. This is a sustainable industry that weathers all storms and always comes back strong!

Growing up on my Dad's farm, I always knew I had a love and appreciation for Mother Earth. This passion drove the direction I wanted to go to pursue my college education. I graduated with a Bachelor of Science degree in Horticulture while also working as a landscape contractor and designer. After graduating, my vision was to create a full service garden center with a landscape design division called DeWitt Landscaping. The business grew to the point where we started a re-wholesale division.

We were using black plastic for weed control, and I saw first-hand the effects of suffocated soil. My clients needed to have sustainable soil in order to grow healthy plants. Never being satisfied with the "norm" I turned this problem into an opportunity by producing the first ever permeable landscape fabric. This landscape fabric allowed air, water and nutrients to pass through and my clients didn't need to use chemicals to eliminate weeds..... Hence, the birth of the DeWitt Company.

Today we remain a family owned and operated company inspired by this industry and driven by our down to earth philosophy. We have a dedicated and talented team that is truly committed to our clients, this industry and our environment.

We are DeWitt. No chemicals then or now.

Together we are creating a better tomorrow!

A Company Built From the Ground Up...

Larry DeWitt started his own landscaping business in Sikeston, Missouri, soon after earning degrees in horticulture and landscape design. In 1977, he was looking for a material to stop weeds and increase plant growth - without chemicals. But back then, black plastic was a landscaper's only option. From hands-on experience, he knew that while plastic stops weeds, it also blocks out moisture and air. The result: disease, fungus and rot.

Unsatisfied, Larry decided to create something better. He experimented with textiles and materials until finally hitting paydirt. He discovered that woven polypropylene did everything he wanted. And his new "landscape fabric," later dubbed DeWitt's Weed Barrier™, changed the professional landscaping industry.

Pros quickly realized what an outstanding product DeWitt's Weed Barrier was - for stopping weeds and also for promoting tremendous growth. They couldn't get enough. As a result, DeWitt products are used in more than 70% of the commercial landscaping done throughout the United States. That makes the company the #1 Choice of Landscape Professionals.

In 2000, the company moved into a 400,000 square foot state-of-the-art manufacturing facility which is centrally located in the heartland of America. By continually investing in technology and equipment, DeWitt is able to consistently provide the highest quality products available in the lawn and garden industry.

Customer service is a priority and DeWitt employees are fully committed to servicing their customers in the quickest, most efficient and problem-free manner possible. DeWitt's reputation for service shows the pride that is taken in every aspect of the job. As Larry DeWitt states "Customer satisfaction is the judge of our efforts. We strive to make zero errors in every facet of the ordering, manufacturing, delivery and billing process."

DeWitt Company continues to lead the competition in the quality and performance of its landscaping and garden products. Efficiency allows the company to keep its pricing as low as possible. Products are made for long term use and are environmentally safe. For your lawn or garden, DeWitt Company has the best products for the best value.

...a Company Dedicated to the Industry

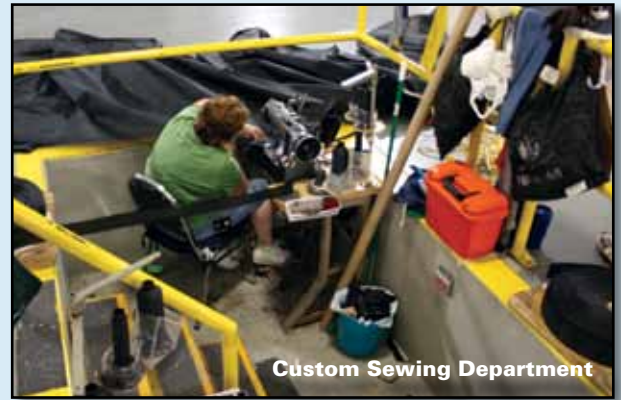

Experienced Sales and Service Team

We know the lawn and garden industry. From manufacturing to on-time delivery, the DeWitt Company prides itself on providing exceptional quality and service. Our philosophy: "The bitter taste of poor quality lasts long after the sweet taste of a cheap price is gone."

Breakthrough Merchandising

Unlike many manufacturers, DeWitt is there to back up our products after you order. We know our continued success is based on your continued success. We are constantly developing new and innovative merchandising systems to better serve your retail needs. We know how important shelf space is in your world and want to make sure you get the most for your money.

“THE FUTURE of the lawn, landscape and garden industries is not only bright, but also beaming with opportunities to grow, learn and evolve. For 30 years, I have watched my family build a company from the ground up, focused on quality products, exceptional customer service and dependable fulfillment. Now is the time to continue to design and create products using state of the art research and development, innovative marketing strategies and widespread distribution throughout the industry. We strive to find environmentally friendly solutions for everyday applications, while continuing to offer the products that you can use and service you can rely on from a company you can trust.” — Meredith DeWitt, Vice President

SunShield Spiral & Straight Anchors

Galvanized Steel Spiral Anchors are great for hay covers, outdoor storage covers & bounce house anchoring. The 3" x 3" triangle top handle makes for easy ground insertion with a firm twisting grip. Spiral Anchors provide optimal holding power. The Galvanized Steel Straight Anchor is typically used for hay covers and heavy duty outdoor tarp applications. Same 3" x 3" triangle top handle makes for easy ground insertion with a firm pushing grip surface. Each comes with a clear plastic protective sleeve on point, individually tagged and UPC Code.

Black Stallion Rubber Straps

Molded of 100% EPDM, Black Stallion Heavy Duty Rubber Straps provide the highest possible quality and physical properties. The Rubber Straps undergo an extensive manufacturing and quality control process to ensure each strap delivers excellent performance and value. The Rubber Straps are manufactured with the graduated TEARDROP design at each end for added strength. The "S" Hooks are made of silicon kiln-tempered and galvanized steel for extra strength and rust protection. The Rubber Straps are retested for tensile strength and Duro Meter hardness, for elongation and stretch recovery, and for ozone and cold resistance. Black Stallion Heavy Duty Rubber Straps come in 5 popular sizes; 10, 15, 21, 31, and 41 inch to meet a wide variety of applications.

Flexible Intermediate Bulk Containers (FIBC)

Load. Ship. Store. Unload. Reload.

The DeWitt Flexible Intermediate Bulk Container, (FIBC) is a standardized container in large dimension for storing and transporting dry, flowable products, such as sand, fertilizers, mulch and rock. The DeWitt FIBC container is manufactured from quality woven polypropylene and tested to meet tear and UV resistance standards, making it strong and durable. FIBC bags compact when empty for storage, are 100% recyclable and reusable. DeWitt's FIBC bags are routinely used by landscapers, contractors, manufacturers and distributors to transport, protect and store up to 2,000 pounds, or 1-ton of dry goods.

Holds down multiple types of items

Biodegradable Stakes

Made in the USA, Biodegradable Stakes are manufactured using recycled materials (polypropylene) with an additive to cause stakes to breakdown and biodegrade. The new ribbed design allows for significantly more holding power than metal staples. Stakes will biodegrade completely over time leaving water, humus (compost) and carbon dioxide as by-products.

Green Fabric Pins & Red Re-Pins™

Green Fabric Pins are made from recycled plastic. They are noncorrosive, sturdy, easy to install and reusable. Fabric Pins can be used to secure landscape fabrics, erosion control products and plant protection products. For best results, pins should be spaced every 2' to 3' around outside edges. For lighter weight products, it is highly recommended to fold over edge and push pin through double-layered material.

Re-pins™ are the ideal anchors for temporary coverings such as DeWitt Plant and Seed Guard, Overwintered fabrics and N-Sulate cold weather plant protector. These nonpermanent stakes are easy to install and remove. Re-pins™ are UV-treated with highly visible red plastic and durable enough for hundreds of uses.

Rubber Pond Liners

The Professional's Choice

Landscapers and other pond building professionals have long recognized PondGard Rubber Liners for their unmatched ease of installation and their ability to conform to the shelves needed for creating natural looking water falls and holding plant containers. Along with being the professionals' lining system of choice, homeowners have also come to value the aesthetic and practical benefits that PondGard liners bring to their outdoor living spaces.

Easy To Install

With panels available in a variety of sizes and lengths, PondGard Rubber Liners can be easily installed using Firestone's dependable QuickSeam™ Tape system; which requires no special tools or utilities for installation.

Flexible For Creative Designs

Easily shaped to fit the size and contours of any water feature, the flexibility of PondGard liners means more creative freedom and the ability to accomplish even the most challenging designs.

Environmentally Friendly

Specially formulated for water gardening projects, Firestone PondGard Rubber Liners are safe for fish and plant life.

Easy Maintenance

PondGard Rubber Liners require virtually no maintenance after installation. And in the unlikely event of a puncture, the liner can be quickly repaired on-site with a self-adhesive QuickSeam Joint Cover Patch, minimizing cost and inconvenience.

Lasting Beauty

PondGard Rubber Liners display outstanding resistance to UV exposure, ozone, frost, snow and extreme temperatures. Developed to protect against microbial attacks and algae growth, our liners contain no migrating plasticizers – which means no cracking or splitting.

Pond Underliner

DeWitt Pond Underliner is a durable, clean, and safe material to install under ponds instead of using cardboard, newspapers, sand or old carpet padding. DeWitt Pond Underliners are constructed of nonwoven needle punched fabrics in various weights. Use of this material under your liner will help protect the inner wall from punctures caused by stones and cushion the pond wall for fish, while allowing gases to escape to maintain the proper biological balance for all pond life. It is easy to use and installs in minutes.

EDGING PRODUCTS ARE PERFECT FOR THE HOMEOWNER & PROFESSIONAL LANDSCAPER

Cutting Edge Solutions!

Soft. Pliable. Flexible — *Curves to Any Landscape Design.*

Recycled Plastic Edging that Keeps Shape and Stays in Place.

DeWitt Edge 15

•15 ft. strip; 5 Strips/Bundle • 40 bundles/Master bundle
 *Includes 4 Stakes & 1 Connector per strip

BULK PACKAGING BUNDLES — Unload on carpet poles like fabric.

DESIGNED FOR CONTRACTORS — Edging fits in 16 ft. trailer.

DeWitt Edge 15 is a great solution for almost any area where mulch needs to stay in, and grass needs to stay out. Made from flexible high-strength material, this strong edging offers extreme versatility for homeowners and professional landscapers alike.

With DeWitt Edge 15 you eliminate trimming, and with DeWitt Weed-Barrier® Pro, you eliminate the weeds. Use them together for professional looking results.

Bundles load and unload easily with unique strapping.

Edging can be installed facing inward or outward!

Seed Germination and Erosion Control Blankets

Curlex® I Single Layer Green

(AEC-SEGRN4) & (AEC-SEGRN8)

- Biodegradable Great Lakes Aspen curled wood excelsior with 80% 6" fibers or greater
- Photodegradable netting on top
- Used on highway embankments, ditch bottoms, slopes, bridges, approaches and medians
- Residential, commercial and industrial developments
- Used for urban drainage, stream banks and waterways
- **Slopes to 2:1, Channel to 7 ft. / S**

Dyed green for aesthetic purposes to give look of grass already in place

Premier Straw (AEC-SS)

- Constructed from biodegradable Midwest straw fibers
- Photodegradable netting on top
- Temporary protection for grass seed and topsoil during germination
- Used on highway slopes and embankments and utility right-of-way
- **Slope/Channel – 3:1 and flatter**

Curlex® I Single Layer Natural

(AEC-SENAT4) & (AEC-SENAT8)

- Biodegradable Great Lakes Aspen curled wood excelsior with 80% 6" fibers or greater
- Photodegradable netting on top
- Used on highway embankments, ditch bottoms, slopes, bridges, approaches and medians
- Used for residential, commercial & industrial developments
- Used for urban drainage, stream banks and waterways
- **Slopes to 2:1, Channel to 5 ft. / S**

Double Straw (AEC-DS)

- Constructed from biodegradable Midwest straw fibers
- Photodegradable netting on top and bottom
- Temporary protection for grass seed and topsoil during germination
- Used on highway slopes and embankments and utility right-of-ways
- **Slope/Channel – 2:1 and flatter**

Straw Seeding Mulch that is Easy to Use, Handle & Clean Up

Plant

Loosen soil with a rake to a depth of 3 inches. Remove weeds and debris. Spread seed and fertilize as recommended. Water.

Cover.

Cover the area with Straw TackSak, Straw Seeding Mulch. Protects grass seed from birds, wind and rain. Water as needed.

Grow.

DeWitt Straw TackSak stops erosion and speeds up seed germination. It biodegrades naturally and is safe for children & pets.

Straw TackSak

DeWitt Straw TackSak is a sack of straw seeding mulch designed to stop erosion and speed up germination. TackSak is made of finely processed straw, cut twice and processed with a bonding agent that gives straw a tackiness which holds it together and protects grass seed from heavy washout, runoff and wind. TackSak conserves water, naturally biodegrades and is safe for pets and children. It also makes great bedding for livestock. Easy to use, handle and clean up. Covers up to 500 sq. feet.

Ground Stabilization System

USE IT ANYWHERE YOU WANT A STRONG SURFACE

GoundGrid® is ideal for a variety of landscape and construction projects, from road surfaces to grassy expanses.

- Building sites
- Parking lots
- Driveways
- Walkways
- Golf courses
- Sport fields
- Lawn areas
- Parks

PRODUCT FEATURES

- Lightweight geotextile fabric
- Product packaged and supplied in compressed accordion packets
- Each grid covers 10 square yards
- Can be cut to any size
- Flexible fabric construction

Create a strong, stable surface for a variety of landscape and construction projects.

AN INNOVATIVE GEOTEXTILE GRID FOR USE IN GROUND STABILIZATION

DuPont™ GroundGrid®

DuPont™ GroundGrid® ground stabilization system is a geotextile grid used for ground stabilization in landscape and construction projects. Simply expand the three-dimensional honeycomb structure, place it on your project surface and fill with gravel, soil, sand or other mineral infill to create a strong and stable surface.

GroundGrid® uses DuPont science to create an uncommonly strong and stable surface for your job site. As with many ground stabilization systems, a three dimensional honeycomb structure holds mineral infill to create a solid ground surface. The difference is that DuPont™ GroundGrid® is made from high-performance fabric engineered by the experts at DuPont. So it's lightweight but tough enough to work hard and last for decades in any conditions, while being uniquely flexible and truly easy to use. Water permeable in both vertical and horizontal directions, for drainage and erosion control

Silt Fence

Silt Fence is the most commonly used fabric for erosion control in residential and commercial construction. Made of woven polypropylene yarns, it is designed to block the sediment while letting the water slowly flow through the fabric. If properly installed, it can control sediment from being washed into streams or rivers, which results in killing fish and other aquatic life.

Silt Fence UPC MFG# 042579

Geotextiles

Non-Woven Geotextiles

are comprised of strong polypropylene staple fibers. They are designed to allow for drainage and soil filtration, separation, permanent erosion control, asphalt overlay, and cushioning.

DNG105 Series

- Used for separation, drainage and filtration
- Landfill drainage & filtration subsurface drainage, highways, etc.
- 105 pound grab tensile strength
- Designed to handle environmental problems found in roads, embankments, landfills, airfields and sports construction projects

DNG120 Series

- Used for separation, drainage and filtration
- Landfill drainage & filtration subsurface drainage, highways, etc.
- 120 pound grab tensile strength
- Designed to handle environmental problems found in roads, embankments, landfills, airfields and sports construction projects

DNG205 Series

- Used for embankment protection, erosion control, ground stabilization, geo-membrane underliner and heavy-duty drainage protection
- 205 pound grab tensile strength
- Applications – separation, reinforcement and filtration

Woven Geotextile Fabrics

are high-quality polypropylene fabrics that stabilize the sub grade and separate soil from the aggregate. With everything in place, you'll experience a reduction in maintenance costs and extended life of your pavement structure. These fabrics work well for unpaved structures as well.

DWG200 Series

- Industry-standard woven geotextile
- Designed for three primary functions – separation (separating the native sub-grade from an aggregate layer), reinforcement (reinforcing an area by distributing weight over a wider area) and filtrating (retaining soil while allowing the passage of water)
- 200 pound grab tensile strength
- Used underneath an aggregate overlay

DWG315 Series

- Uses – roadway and railway stabilization and reinforcement – parking lots, residential streets, roadways
- High tensile strength for soil separation over moderate sub-grade
- 315 pound grab tensile strength

ZIP TIES

Excellent Alternative to Steel Wire Fence

4 FT. Orange Barrier Fence

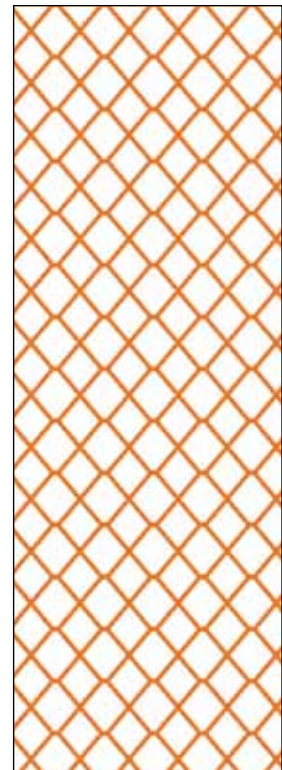

Orange Barrier Fence is an excellent choice for short term applications and is a great high visibility barrier to prevent accidents around unsafe areas. Primary uses include construction sites, newly paved or sealed driveways, ski & snow slopes or anywhere a barrier is needed to control access. Also works great for crowd control at various events. Made of high density polypropylene, it is ultraviolet resistant and easy to handle, install, and relocate.

Safe & Humane Alternative to Wire Fencing

Deer Fencing – 3/4 inch opening

Deer Fencing

Deer Fencing is a safe, humane alternative to wire fencing. It discourages deer and other small animals from destroying gardens and other vegetation. Deer Fencing is an environmentally safe mesh netting made from polypropylene strands bonded together. With a 3/4" hole opening, it is UV-treated for longer lasting durability. It attaches easily to metal or wooden stakes.

Blocks Sediment While Letting Water Flow Through

Silt Fence

Silt Fence is the most commonly used fabric for erosion control in residential and commercial construction. Silt Fence is made of woven polypropylene yarns, which is designed to block the sediment while letting the water slowly flow through the fabric. If properly installed, it can control sediment from being washed into streams or rivers, which results in killing fish and other aquatic life.

Sunbelt Resists Tearing, Puncturing & Weed Penetration

Ground Covers

No one has more experience with ground cover than the DeWitt Company. With over 30 years experience in the production of permeable weed control fabrics, the DeWitt Company pioneered the field and was the first to offer the technology. DeWitt offers the best selection of quality woven ground covers in the market.

Sunbelt

Our Best — Sunbelt Woven Ground Cover consists of 3.2 oz. polypropylene, which resists tearing, puncturing and weed penetration. It is approved for most government weed control applications. Sunbelt is ideal for greenhouses, outdoor displays and as a weed barrier for plantings without topical coverings where a weed-free environment is a must. DeWitt Sunbelt is striped every 12 inches to aid in plant alignment and is UV-stabilized to last even in direct sunlight.

White Ground Cover

White Ground Cover is a 3.2 oz., UV-stabilized, white woven polypropylene fabric. It is a strong, heavy fabric, which allows it to be more resistant to tearing, puncturing and weed penetration. White Ground Cover can also be used as an alternative to a frost blanket. When applied on top of plantings, it protects against light frost and cold temperatures by holding heat in during the day and by blocking wind at night. White Ground Cover is permeable, allowing water and nutrients to pass through. It is excellent when used in rose growing operations.

DeWitt Weed-Barrier® 12 Year (Earhttone)

DeWitt Weed-Barrier® 12 Year Earhttone is a two-color, UV-treated, spunbonded fabric, which offers the same benefits as DeWitt Weed-Barrier® 12 Year. However, the fabric has an earth-tone colored layer giving it a natural look – versus traditional black fabric – which makes it ideal for use with bark or mulch. This one-of-a-kind fabric is only available through DeWitt Company.

Landscape Fabric Prevents Weeds Without Chemicals

DeWitt Weed-Barrier® 12 Year

DeWitt Weed-Barrier® 12 Year is an easy-to-use, environmentally safe fabric that controls weeds before they start. Its unique design provides several advantages over conventional weed barrier products. It is fabricated using a spunbond method, which sandwiches melt-blown material between two layers of spun material, forming a powerful 3-ply layer of weed protection. Plus, the fabric's higher carbon black content provides superior light-blocking capabilities to protect against the toughest perennial weeds. The design also prevents unravelling and makes the material easier to cut. In addition, DeWitt Weed-Barrier® 12 Year is hydrophilic-treated, providing improved water and nutrient flow through the fabric.

Recommended Product Usage: These fabrics need to be covered with mulch or rocks to prevent UV degradation.

Paper Mulch Approved for Organic Food Production

DeWitt Garden Weed-Barrier®

Biodegradable Paper Mulch designed for annual gardens and planting

Stop Weeds

100% Natural

Conserves Water

- Allows air and water through
- Made from natural paper fiber
- Gradually decomposes
- Lasts a full growing season
- No clean up, tillable into soil
- Excellent for vegetable gardens
- Use in flower gardens, too

Easy Installation » Unroll. Install.

- Lay DeWitt Garden Weed-Barrier over garden bed and cut an (X) into dry paper, where the plant is to be located
 - Secure paper with DeWitt E-Staples
 - Cover edges with soil to hold in place and plant your vegetables or flowers
 - Water as normal. Watch garden grow!
- NO WEEDS!**

Garden Weed-Barrier

Economical, light-weight paper mulch that helps control weeds and is 100% organic and an environmentally responsible alternative to black plastic. Made from premium recycled paper, DeWitt Garden Weed Barrier® is chemical free and OMRI Listed® — making it approved for organic food production. Our line of paper mulch is perfect for vegetable gardens and designed for annual planting. Garden Weed Barrier® stops weeds, helps conserve moisture and doesn't interfere with the natural balance of the land. The paper mulch naturally biodegrades or can be tilled back into the soil, putting nutrients where they belong.

Shade Cloth Products That Are Perfect For Pets

Covers Create Enough Shade To Keep Your Dog Cool While Allowing Air To Circulate Freely

Kool K-9™ Dog Kennel Cover

Kool K-9™ is a tough, UV stabilized, woven polypropylene cover that protects your pet from the heat and wind. These covers provide an 80% shade factor and will not rot, mildew or permit the growth of fungus. Covers are specially designed to create enough shade to keep your dog cool while allowing air to circulate freely. These covers can also be utilized as a wind or snow break during the winter months. The perimeter is double-stitched and solid brass grommets are placed every 12" for extra strength and durability. *Includes 11" Dewitt Zip Ties.*

Protect Your Pets From the Elements

Covers Can Also Be Used As A Wind Or Snow Break During The Winter Months

Shady Dog™ Dog Kennel Covers

Shady Dog™ is a high-density polyethylene, lock-stitched, knitted shade screen. These UV stabilized shade screens provide a 60% shade factor and will not rot or mildew. Shady Dog™ cools your pet by blocking hot infrared sun rays and drawing cool air up from the ground to reduce temperatures under the kennel cover. This shade fabric can also be utilized as a wind or snow break during the winter months. The perimeter is double-stitched and solid brass grommets are placed every 24" for extra strength and durability. *Includes 11" Dewitt Zip Ties.*

"Because freezing weather can hit at a moment's notice, we encourage our customers to be prepared with DeWitt Overwinterized Fabrics. These fabrics not only protect your plants, they extend your growing season, as well! As is the case with all of our products, this protection is a phone call away."

— **Larry DeWitt, Founder & CEO**

Deluxe

This .5 oz. fabric keeps temperatures under fabric warmer than outside conditions and creates an excellent micro-environment for seed germination and seedling growth. In fact, this fabric provides 90-95% average seed germination compared to a 60-65% average with straw.

Deluxe Plus

This 1 oz. fabric protects vegetation from frost by raising temperatures beneath the fabric. In addition to providing protection against cold, wind, birds, insects and scorching sun, Deluxe Plus helps produce larger, earlier and more productive yields.

Supreme

This 1.5 oz. fabric is ideal for protecting flowering annuals, bedding plants and vegetables from severe cold and freezing. Temperatures underneath the fabric are warmer than outside conditions. Want to lengthen your harvest time and extend your flowering season? Then use DeWitt's Supreme Crop Protection Fabric.

Ultimate

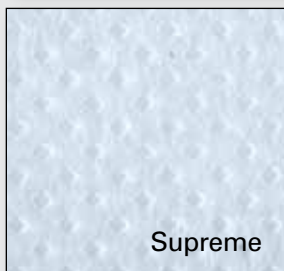

This ultimate 2.5 oz. fabric provides freeze protection or greater plant protection during extreme conditions. DeWitt's Ultimate is the most durable, effective product available on the market for "all winter" protection of your perennials and other ornamentals. Designed to hold in heat and allow irrigation and rain to pass through, this fabric will not cause foliage burn even on sunny days.

DeWitt SOLAR HEATING **GRO-TUNNEL**

With **HYDROTHERMAL
WATER TUBES**

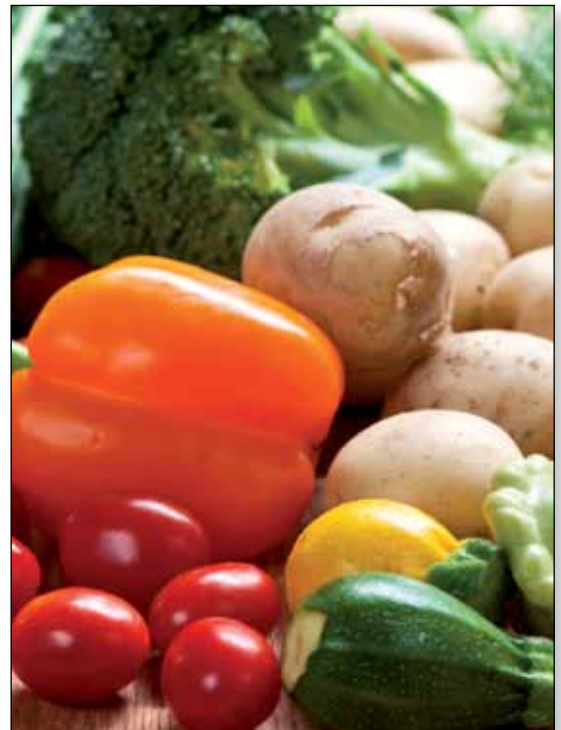

**Sun Heats Water
by Day and Heats
Plants by Night**

GRO-TUNNEL KIT INCLUDES:

- 2 Solar-Heated Water Tubes & 8 Zip Ties
- DeWitt Fleece Cover with Built-in Hoops
- DeWitt Weed-Barrier Landscape Fabric

2' WIDE X 10' LONG X 18" HIGH

Water Tubes are 5" in diameter and 10' long. They each will hold 10 gallons of water and will release heat at night.

■ **Weed-Barrier:** 3'x10' tunnel fabric is made from UV treated 2 oz. sq. yd. polypropylene spunbond fabric which allows air and water to pass through but stops weeds from growing inside the tunnel.

■ **Solar-Heated Water Tubes:** (2) 5" diameter X 10' long. Made from durable 4 mil black thick polyethylene. Each tube holds 10 gallons of water and includes 8 DeWitt Zip Ties. The water absorbs the heat from the sun's rays during the day and releases the heat at night.

■ **DeWitt Fleece Cover:** Made from 2 oz. sq. yd. rugged polypropylene and will not rot or mildew. UV treated for longer life. Holds heat in. Lets rain through the fabric.

DeWitt Solar-Heating Gro-Tunnel

Create a warm, humid environment for your Spring, Fall and Winter gardens. The DeWitt Solar Heating Gro-Tunnel is constructed of DeWitt Fleece Cover which absorbs the heat of the sun while allowing air, water and light through to stimulate growth. The Gro-Tunnel has two solar-heated water tubes that run along each side. Each tube holds 10 gallons of water, when heated will release BTUs of heat at night. The floor of the Gro-Tunnel is made from DeWitt Weed-Barrier landscape fabric, which collects heat, prevents weed growth and conserves soil moisture, in turn promoting healthy plant growth, thus eliminating the need for herbicides. When plant maturity has been reached, you simply slide the sides of the Gro-Tunnel upward and harvest your crop.

Solar Heating Gro-Tunnel

ITEM #	DESCRIPTION	UPC	SCC	WT	CI	PK	PK/CS
GRO-TUNNEL	10" GRO-TUNNEL 6 PACK	822898	503957	43	47788	1	6

INSTALLATION: Easy as 1-2-3.

1. Prepare the soil. Lay the 36" X 120" fabric. Install plants or seeds. Lay solar tubes on both sides leaving at least 8" fabric on both sides.
2. Install the tunnel by pushing the wire supports through the fabric being extra careful not to puncture the solar tube.
3. Fill the tube with water. Twist the end like a bread wrapper. Install Zip Tie and tighten, fold twist and install Zip Ties around twisted tubes for extra security from leakage. Close end and GROW.

SunShield Spiral & Straight Anchors

Galvanized Steel Spiral Anchors are great for hay covers, outdoor storage covers & bounce house anchoring. The 3" x 3" triangle top handle makes for easy ground insertion with a firm twisting grip. Spiral Anchors provide optimal holding power. The Galvanized Steel Straight Anchor is typically used for hay covers and heavy duty outdoor tarp applications. Same 3" x 3" Triangle top handle makes for easy ground insertion with a firm pushing grip surface. Each comes with a clear plastic protective sleeve on point, individually tagged and UPC Code.

Rubber Straps

Black Stallion Rubber Straps

Black Stallion Heavy Duty Rubber Straps are molded of 100% EPDM Rubber to provide the highest possible quality and physical properties. The Rubber Straps undergo an extensive manufacturing and quality control process to insure each strap delivers excellent performance and value. The Straps are manufactured with the Graduated TEARDROP design at each end for added strength. The "S" Hooks are made of Silicon Kiln-Tempered and Galvanized Steel for extra strength and rust protection. The Straps are retested for tensile strength and Duro Meter hardness, for elongation and stretch recovery, and for ozone and cold resistance. Black Stallion Heavy Duty Rubber Straps come in 5 popular sizes; 10, 15, 21, 31, and 41 inch to meet a wide variety of applications.

Heavy Duty Forest Shade Tarp - UV 4.5 oz.

An environmentally compatible color visually recedes in outdoor setting. This heavy duty tarp weighs 60 % more than most polyethylene tarps. Tightly woven fabric provides more puncture resistance. Thicker coatings on each side adds longer product life. Black anodized grommets about every 3 feet around the hem, 10 mil. thickness with UV resistant top and bottom coating give added strength and securing dependability. Green on both sides. Many applications include firewood cover, patio furniture cover and building supplies.

Reinforced Corners

SunShield Silver/Black Tarp - UV 6.0 oz.

The SunShield Silver/Black 6 oz. tarps are very rugged and designed for use under continuous outdoor exposure. SunShield is made with high density woven fabric along with UV treated coatings on both sides to provide extended life in the sunlight. In addition, using SunShield with the reflective silver side up will divert both heat and ultraviolet light, while using the black side up will absorb heat/divert ultraviolet light. Both sides are heat and cold resistant. SunShield is also an excellent sunblock fabric. The tarps include patent pending molded reinforced corners, rust proof grommets every 24 inches and bolt rope hems to provide dependable tie down points. Suggested uses include material covers, recreational vehicle covers, pool covers and rolled hay covers.

DRIP IRRIGATION SYSTEM FOR NEWLY PLANTED TREES

- Eliminates the severe water stress new trees endure after transplanting while preventing water run-off and evaporation.
- The Tree Watering Bag reduces transplant shock during the spring and fall, when new trees are most likely planted. Also great for soaking during summer droughts.
- Single bag fits trees up to 3" caliper and holds 15 gallons.

Zip together 2 bags for trees 3"-5" caliper to hold 30 gallons

DeWitt Dew Right Tree Watering Bag

Take the stress out of planting new trees with the new DeWitt Dew Right Tree Watering Bag; a 15 gallon bag designed to provide a drip irrigation system directly to tree roots over an extended period of time. Made of heavy duty green coated polypropylene with nylon webbing, poly straps, and black nylon zippers, the DeWitt Dew Right Tree Watering Bag has micro-perforated release points along the bottom seams for a slow release of water. Safe to use with nutrient or chemical additives, the bag needs to be filled 1-2 times per week for most trees.

saves TIME | conserves WATER | saves TREES
BY DESIGN | BY DESIGN | BY DESIGN

- Maximize add-on bare-root season tree and shrub sales.
- Insure your customers will have a successful planting experience.
- Better than a sprinkler, it concentrates water on the root zone and slowly releases its contents for a deep, penetrating watering.
- Great gardening aid for situations in which underground watering systems and hoses are unavailable or impractical.

Tree Watering Donut Continuously Waters for Up to 8 Hours

DeWitt's Tree Watering Donut is Designed to Provide a Drip Irrigation System Directly to Roots Over an Extended Period of Time.

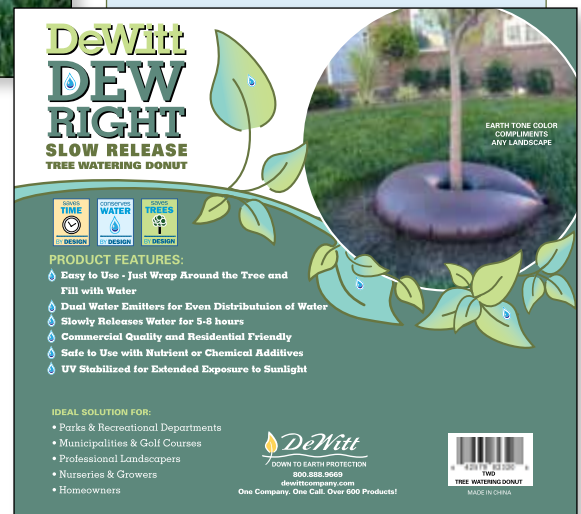

- Perfect for newly planted shade or ornamental trees with trunks up to 4"- 5" inches in diameter.
- Saves trees with deep water saturation and helps reduce transplant shock and stress from drought.
- Eliminates wasted water due to run-off and quick evaporation.
- Install and fill in just minutes - requires re-filling 1- 2 days per week for most trees.

DeWitt Tree Watering Donut

Take the stress out of planting new trees with our slow release tree watering donut. Designed to ensure that your new trees will survive their crucial first year after being planted. It eliminates the severe water stress new trees endure after transplanting by delivering a high volume of water directly to their root system. Easy to use, just wrap around the tree and fill with water. Dual water emitters distribute water evenly. Slowly releases water for 5-8 hours.

IDEAL SOLUTION FOR:

- Parks & Recreational Departments
- Municipalities & Golf Courses
- Professional Landscapers
- Nurseries & Growers
- Homeowners

Helps Trees Grow Straight and Healthy

Tree Rope / Poly Twine

Tree Rope is made of polypropylene that won't rot and is UV-treated to resist deterioration and is reusable. Its flat, snake-like form will not girdle trees like conventional ropes – no need for turn buckles or vinyl garden hose. Twines are used for garden, home, office and packaging.

Tree Wrap

DeWitt Tree Wrap protects trees from scorching, and from trimmer and mower damage. Tree Wrap is made of polypropylene fabric and easily conforms to fit any tree shape or bark texture. Tree Wrap slowly photo degrades to prevent girdling of the tree's trunk. This product is approved by leading universities and horticulturalists.

Protective Netting for Fruits & Vegetables

Bird Barricade & Deluxe Bird Barricade

Protect your prized plants and all your hard work from destructive birds, scavenger animals and other pests with DeWitt's Bird Barricade and Deluxe Bird Barricade. Bird Barricade is constructed of polypropylene strands and has a 3/4" hole opening and the Deluxe Bird Barricade is made from polyethylene strands bonded together with a 1/4" hole opening. Both are UV-treated for longer lasting durability. Get more than one season from Deluxe Bird Barricade by storing it away from sunlight when protection is no longer needed.

Safe and Humane Alternative to Wire Fencing

Deer Fencing – 3/4 inch opening

Deer Fencing

Deer Fencing is a safe, humane alternative to wire fencing. It discourages deer and other small animals from destroying gardens and other vegetation. Deer Fencing is an environmentally safe mesh netting made from polypropylene strands bonded together. With a 3/4" hole opening, it is UV-treated for longer lasting durability. It attaches easily to metal or wooden stakes.

Environmentally Responsible Way To Eliminate Biting Bugs

Skeeter+Plus™

Designed by experts in the field of pest-borne diseases, Skeeter+Plus™ utilizes scientific and non-toxic chemical engineering to create what may be the world's most effective pest trap. By placing Skeeter+Plus™ in the yard at the beginning of the mosquito season, and by using multiple attractants, including carbon dioxide, Skeeter+Plus™ is the environmentally responsible way to eliminate biting bugs. Using an All-Natural Recipe of apple cider vinegar and baking soda (not included) lures mosquitos to Skeeter+Plus™. Four months supply of adhesive disks included. Additional disks purchased separately.

- **Safe and Easy to Use**
- **No Chemicals or Toxins**
- **Attracts and Traps Biting Insects:**
Mosquitos, Gnats and Flies
- **Environmentally Responsible**
- **Lightweight and Portable**
- **Blends With Outdoor Setting**
- **Aesthetically Pleasing**

Natural Wasp Away Discourages Wasp Nest Building

Natural Wasp Away

DeWitt Natural Wasp Away works like a scarecrow for wasps. The DeWitt Natural Wasp Away is perceived as a hornet's nest so wasps see this as a predator and avoid the area. DeWitt Natural Wasp Away keeps wasps away but does NOT kill them. Wasps are beneficial to our environment and help regulate other pests such as aphids, caterpillars and mosquitoes. Made from all natural material - 70% bamboo and 30% weather resistant cotton. Interior spring coil guarantees to hold the shape. No chemicals or sticky mess!

- Hang Under the Eaves and Gables in Early Spring to Help Prevent Nest Building**
- Hang Under Your Patio Umbrella**
- Portable - Take Hiking, Camping or Anywhere!**
- 100% Guaranteed!**
