Welcome to the Future of Cleaning

Ettore Steccone invented the window squeegee over eighty years ago in Oakland, California. His T-shaped tool, manufactured of brass with a single precision slit rubber blade, dried windows virtually streak-free and became the better way to clean glass.

Today, his family still runs this small independently owned company and continues his legacy by bringing quality products, not only to the professional, but to homeowners around the world. The spirit to innovate and discover new and better ways to clean is alive and well at Ettore Products Company. As we look to the future of cleaning, where there will certainly be an increase in glass windows and solar technology, our goal is to remain at the forefront of innovation and continue to produce the finest cleaning tools available.

Pro+ Super System T-Bar with Microfiber Sleeve

Microfiber Sleeves

Ettore Advanced Microfiber sleeves continue our tradition of uncompromising perfection in sleeve performance.

- Extremely fine Microfibers allow for maximum scrubbing power.
- Most models also provide extra scrub pad for added scrubbing power on stubborn material.
- Each product retains at least 20% more solution than all of the competitive models.
- Double seams on all sleeves allow for longer lasting and more durable performance.
- Durable Microfiber can withstand at least 500 washings.

4 Cartridge Filtration System

The Aquaclean system is designed to reduce the maintenance and cost in manufacturing pure water. Pretreatment cartridge, Reverse Osmosis and a De-Ionization. We have created the ultimate system that requires the least filter replacement than anything else on the market.

Step 1. Tap water flows into the Carbon/KDF prefilter to begin the anti-scaling process and remove chlorine in the water supply.

Step 2. The Reverse Osmosis Membranes separate water and removes 92% to 95% of total dissolved solids.

Step 3. The De-Ionization Cartridge removes the remaining total dissolved solids, producing water that is 99.99% pure.

Aquaclean Poles

Unlock the power of the new gold standard in water-fed poles.

The all new Aquaclean Carbon Fiber Pole is the most powerful water-fed pole you can buy. The revolutionary Carbon Fiber design provides greater rigidity at longer lengths than any other pole on the market, allowing for effortless brush control. Each pole has an aluminum outer tube that adds strength when extended and protects the carbon fiber inner poles when fully retracted. It's easy to transport, even in small vehicles.

The new Multifunction Clamping System positively locks each section, preventing unintended pole collapse. The ergonomic design of the locking tabs minimizes fatigue and are engineered for long lasting performance. Each clamp has a tapered bottom that eliminates pinch points and prevents the pole from getting caught on window sills and branches. And replacement pole sections easily bolt on—no more gluing sections together.

Choose one of our six pole length options, starting from ten feet/collapsed length of 47 inches

New clamp design has positive locking tabs that won't release unintentionally

Each clamp has a tapered bottom to prevent snags and keeps the clamps separated to prevent pinch points

Durable endcap protects the end of the pole and features a side hose aperture that prevents kinks.
