Buna O-Rings

These round-profile Buna-N O-rings are suitable for a wide range of static and dynamic sealing applications. They are resilient and offer excellent resistance to tearing, grease, hydraulic oils, and motor oil.

Temperature range from -20° to 200°

Nitrile O-Rings

Offering better wear resistance than standard Buna-N O-rings, these hard O-rings are also resilient and tear resistant. They resist grease, petroleum fluids, and motor oil.

Temperature range from -20° to 200°

Viton O-Rings

These Viton® fluoroelastomer O-rings resist a wide range of chemicals, including benzene, butyl alcohol, and ethylene glycol.

Temperature range from 0° to 400°

PLASTIC COMPARTMENT BOXES

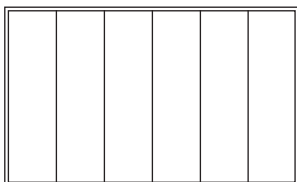

FAS-KIT®

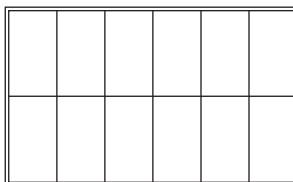

These Small compartment boxes are manufactured of high strength, oil resistant polypropylene, and are furnished with heavy duty reinforced hinges that have a special feature which allows the cover to stand up in the open position. The cover overlaps on all sides of the box, fitting snugly against a shelf-like ledge for extra protection against dirt, dust and moisture. Two snap latches assure secure closure and prevent parts from moving between compartments.

Slide Rack for Plastic Compartment Boxes

Part # FK70430

This Rack is manufactured of cold rolled steel and is finished in durable gray baked enamel. The unit holds 5 Plastic Compartment Boxes to create a compact and efficient small parts storage system. The versatile rack has been designed for three way use. Keyhole slots are furnished for wall mounting. A handle is provided and bolt holes permit stacking.

(Plastic Boxes sold separately.)

Dimensions:

11-1/4"W x 6-3/4"D x 10-3/4"H

Locking Hinge

(Optional)

Part # FK70440

The Locking hinge is designed to hold boxes in place when being transported in a moving vehicle. The hinge may be padlocked to provide for security.

Manufactured of prime cold rolled steel and finished in rust and acid resistant baked enamel. Small compartment boxes have high impact plastic inserts. The inserts have rounded scoops, making it easy to remove small parts. All models have covers designed to stay open, making it easy to access parts and to read cover labels. All models also have handles and positive, pull-down catches.

RACKS FOR SMALL SCOOP COMPARTMENT BOXES

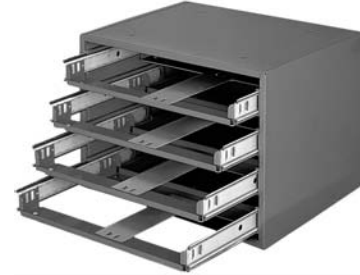

These Small Racks are designed to hold Small Scoop Compartment Boxes. They are manufactured of prime cold rolled steel and finished in rust and acid resistant baked enamel. All parts, including cradles which support scoop boxes, and coated slides and tracks, are tooled for quality and uniformity. A center panel on each cradle keeps boxes from falling through, and special stops prevent units from being accidentally pulled from the rack. Racks are reinforced for strength and support loaded boxes in the open position without tilting.

Small Scoop Boxes are sold separately. Refer to previous page.

These Drawer Cabinets have a reputation for quality construction. They are manufactured with completely automated tooling to provide uniformity. Only prime cold-rolled steel is used, and finishes are rust and acid resistant baked enamel.

Vertical supports provide strength, and embossed mounting holes allow the cabinets to be stacked. Drawers have two runners for smooth, easy travel and are prevented from being accidentally pulled out of the cabinet by a positive stop.

Drawers for all Drawer Cabinets also feature interlocked design, resulting in unequalled strength. They have full width handles for easy opening. Drawer sides are slotted on one inch centers to hold dividers. **Two dividers with special snap-in features to hold them in place, are provided with each drawer.**
