

**#45618**
2" Type R Quick Change Disc

Specifically designed to polish smaller surface areas, quick change button allows fast changeover and applies additional pressure and support with rubber backing pad. Discs can be used flat or on edge, for multiple contours or part geometries.

Specifications

Diameter	2"
Button Type	Type R
Max RPM	16,100
Opt RPM	9,500
Brand	SHUR-BRITE™
Material Type	Nonwoven
Nonwoven Class	Final Polishing
Nonwoven Category	Unitized
Abrasive Grain	Silicon Carbide
Product Form	Quick Change Disc
Grade	2SVF
Standard Package Quantity	10
Stock Status	Stock

Features / Applications

The layered, non-directional construction of SHUR-BRITE™ Unitized Wheels and Discs ensures continual exposure of abrasive grains during surface preparation, cleaning, blending and polishing operations. A variety of sizes and grades are available for use with intricate components to larger workpieces. Due to the conforming nature of unitized materials, surface requirements can be achieved without affecting workpiece tolerances, and with minimal heat buildup.

Features

Will not alter part geometry or critical tolerances
Small parts finishing and polishing
Easily controllable operation and applied finesse
Blend, finish or polish small spot welds with surrounding surface
