

Light Duty

Cut-Protection

Exceptional cut protection in a form-fitting ultralight weight glove with enhanced grip performance.

- The 11-541 epitomizes the convergence of protection and performance. It features an 18G ultralight weight liner with INTERCEPT TECHNOLOGY® yarns that provides ANSI Cut 4.
- The liner also features ZONZ™ Comfort Fit technology for breathability and ergonomic movement.
- The palm-dipped coating and the FORTIX™ formulation provide enhanced abrasion resistance and grip.
- To provide all four advanced performance technologies, including ANSI Cut 4, in a comfortable, flexible ultralight weight style, is a game changer for applications where workers have traditionally guarded against cut risks with heavier styles that limit their dexterity and breathability.

Industries

- Aerospace
- Automotive
- Machinery and Equipment
- Metal Fabrication

Applications

- Assembly of small sharp parts
- Handling small sharp metal parts
- Light duty stamping
- Maintenance

Performance Profile

- New-to-the-world INTERCEPT TECHNOLOGY® cut resistance yarn has been designed to exceed industry standards. This Ansell proprietary technology offers best-in-class cut protection and increased comfort with dexterity.
- ANSELL GRIP Technology is a coating treatment that minimizes the force required to grip oily or wet tools or materials, reducing hand and arm fatigue and improving control, safety and productivity.
- FORTIX Technology applies a thin, resilient and breathable nitrile foam coating, which extends gloves' working life and improves comfort in abrasive applications.

Key Features

- Ultralight weight glove that offers unparalleled dexterity and refined mobility.
- ZONZ knitting technology uses selected yarns and varying stitch designs to tailor overall glove fit to enhance hand movement for higher dexterity and reduced fatigue.
- Silicone free design is paint and finish process friendly.
- Dirt masking palm for longer wear times.
