Manufacturing In Fort Wayne, Indiana Since 1987 HIGH PERFORMANCE **SEALANTS & ADHESIVES** UNPARALLE LED **SERVICE** QUALITY **DRIVEN**

ASI PRODUCT CATALOG 2019 PAGE 2

THE ASI® ADVANTAGE.

HIGH PERFORMANCE PRODUCTS. UNPARALLELED SERVICE. OUALITY DRIVEN.

Located in Fort Wayne, Indiana, American Sealants has become a trusted manufacturer of sealants, adhesives and specialty chemicals since 1987.

We have built a successful company in a crowded market by having a team of good people who care about the performance of our products and the happiness of our customers. We understand the importance of being responsive and developing a partnership with our customers to help them achieve their goals.

We are focused on manufacturing products that continue to perform in the toughest applications and environments. We have a commitment to quality that starts with formulation development and continues into compounding, packaging and shipping.

APPLICATIONS & INDUSTRIES SERVED

ASI® products are widely used and recognized in the construction, industrial manufacturing, transportation, electronics, automotive, telecommunications and other specialty industries.

Due to the performance and nature of our products, they are used for a wide variety of applications.

Product Assembly & Manufacturing • Window & Door Manufacturing & Installation • Sealing & Bonding Construction Applications

Trailer & RV Manufacturing • HVAC Applications • Waterproofing • Automotive Gasketing • Aquarium Manufacturing & Repair • Roofing

INNOVATING NEW TECHNOLOGIES

Our product development team is continually working with the newest technologies to provide new and unique solutions for our customers' applications. We not only want to improve product performance but also user safety and experience.

Using the most advanced polymer technology available today we are formulating our hybrid polyether sealants, adhesives and coatings to set the bench mark for user safety and performance.

Learn more and see full **Hybrid** product line on Page 3

American Sealants Inc. has built a reputation based on the knowledge and experience we have to offer customers of all sizes. We have a dedicated staff who understands a customer's supply chain needs and the importance of quality. With industry leading innovative equipment and a dedicated, experienced workforce, we can fulfill your business needs.

PRODUCTS & SERVICES

We have the capability to produce mass volume for large users as well custom batches for applications that may require something beyond our standard product offering.

TECHNOLOGIES INCLUDE: Neutral Cure Silicones • Acetoxy Cure Silicones Specialty Silicones • Hybrid Polyethers • Siliconized Acrylic Latex • Butyl Sealant Silicone Greases • Heat Sink Compounds • STPe

PACKAGES INCLUDE: Laminate Squeeze Tubes, Caulking Cartridges, Sausage Packs, Quart Caulking Cartridges, Plastic Squeeze Tubes, Metal Squeeze Tubes, Laminate Pouches, Pails, Drums, Semcos, Syringes, Jars & Pressurized Piston Cans.

Formulating & Color Match

ASI has the capabilities to custom formulate and custom color match per your application requirement.

Custom

- Experienced Technical Staff for Developing Products
- Quality Process Checks Colors
 Throughout the Job on Every Shipment
- Ability to Accurately Match Solid and Mixed Color Patterns
- Ability to Package into Any of Our Packaging Options
- Flexible Minimums and Service

ASI has 30+ years of experience private labeling for both large & small companies going into retail box stores as well as automotive, industrial & construction companies wanting to grow their brand's sales. We can help you find the right product and packaging for your application and create a private label product you are proud of.

- Large Volume Capabilities
- Low & Flexible Minimums
- Industry Leader in Packaging Options & Technology
- Application Advice & Support
- Diverse Product Options, Custom Formulations & Colors Available

- Capability to Mix a Wide Variety of Products & Chemistries
- Large Volume Batch Manufacturing Available
- Industry Leader In Packaging Options & Technology
- · Low & Flexible Minimums
- High Speed Packaging For Large Volume
- Detailed Quality Control Processes

ASI'S INNOVATIVE HYBRID PRODUCTS

ASI's innovative hybrid sealants and adhesives are made using one of the most advanced, high performance polymer technologies available in sealants today.

Using this silyl-terminated polyether technology we have formulated products made to outperform conventional technologies as well as other hybrid polyether products seen in the market. Our team has been able to increase user safety by eliminating solvents, isocyanates and large amounts of VOC's. Our hybrid polyether products are 100% solids, UV and weathering resistant, easy to dispense and tool, capable of exterior use in extreme climates, paintable, extremely low odor, VOC compliant and california propostion 65 compliant.

HYBRID PRODUCT LINE

ASI 5900 • ASI 55 • ASI 57 **ASI 53JM**

DISADVANTAGES OF **POLYURETHANES**

- Long Skin & Cure Time
- Water/Moisture Before Cure Causes **Bubbling & Outgassing**
- Health Risk, Contains Isocyanates
- Can Be Difficult to Tool & Use
- Lack of Adhesion To Some Substrates

DISADVANTAGES OF SOLVENT BASED SEALANTS

- Health Risk, High VOC Content
- · Product Shrinks When Solvent Flashes Off
- Low Elongation & Movement Capabilities
- · Hard to Tool When Cold, Runs When Hot
- Packaging Constraints Due to Solvent
- Weatherability Can Vary

DISADVANTAGES OF **SILICONES**

Solids

Will Not Shrink

- Not Paintable
- · Must Cure Before Water Contact
- Acetoxy Silicone, High Odor
- · Limited Use As an Adhesive

DISADVANTAGES OF ACRYLICS

- · Washes Off With Rain
- De-bonds From Ponding Water
- · Shrinking Due to Water Loss
- Slow Strength Build Up
- Freezing Constraints
- Low Physical Properties
- Exterior Use Constraints

ASI® GENERAL RTV SILICONE PROPERTIES

ASI's RTV Silicones have over 30 years of proven performance in a variety of demanding industries. We can help you find the right product for your application.

All RTV silicones are not the same. ASI RTV Silicones are made to perform and have general attributes that overall make them great sealants and adhesives. However, we use two different chemistries of RTV silicones because there are benefits to each that make them better fits for certain applications depending on your requirements. We then use different formulas of each chemistry to define certain needs even further. This broad product line allows us to have the right products for your needs and our experienced staff is always here to help make that product selection.

Which Silicone Chemistry Is Right For You?

PROS

Characteristics of ALL ASI® RTV Silicone Products

- Flexible at Various Temperatures
- Good Chemical Resistance
- Wide Operating Temperature Range
- Weather Resistance
- **Excellent Movement Capacity**
- Solvent Free, Isocyanate Free Resistant to Humidity & Water
- Excellent For Use As A Sealant, Adhesive, Coating, Encapsulating & Waterproofing
- Excellent Life Span (40+ years)
- High Degree of Elongation
- Easy to Dispense When Cold **Excellent Shelf-Life Storage**
- **VOC Compliant**
- Outstanding Thermal Stability
- **Broad Ahesion Range**
- Excellent UV Stability
- Easy To Use & Tool
- One Part, Room Temperature
- Not Paintable (For applications that need painted see our **Hybrid Products**)

Neutral Cure

Silicone

Not Food Grade

- Low Odor
- Broader Adhesion Range
- Adhesion to Concrete
- Non-Corrosive to Most Metals
- Resistant to Oils & Some Chemicals

Primary Concern

CONS

Odor Tack Free Time Adhesion To Food Grade Metal Corrosion

Acetoxy Cure Silicone

- Bonds to Common Substrates
- Food Grade Available
- Faster Tack Free Time
- Resistant to High Temperatures
- Vinegar Odor Released
- Corrosive to Sensitive Metals When Confined
- Not Suggested for Long-Term Adhesion to Concrete
- Less Extensive Adhesion Range

ASI 335 Neutral Cure Silicone

Advanced Adhesion **Broad Application Use**

ASI 335 Window Sealant

Bonds to Common Substrates, **General Applications**

ASI 306 Flowable Electronic Grade Silicone

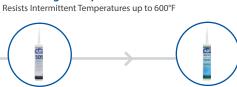

Use on Electronics or a Self-Leveling Joint Sealant

ASI 388 Electronic Grade Silicone

UL Recognized, Use for Encapsulating, Bonding, Etc.

ASI 600 High-Temp Silicone

ASI 505 Self-Leveling Silicone Fast Skinning Self-Leveling Joint

ASI Aquarium Sealant

High Tensile Strength, Aquatic Life Safe Silicone

Additional neutral cure silicones sub types: Alkoxy & Methoxy . Acetone silicone also available. Advantages and disadvantages are seen with each. ASI does supply these products as well as specialty products needed per application. What is listed is just a "standard offering" and not representative of the hundreds of products we offer.

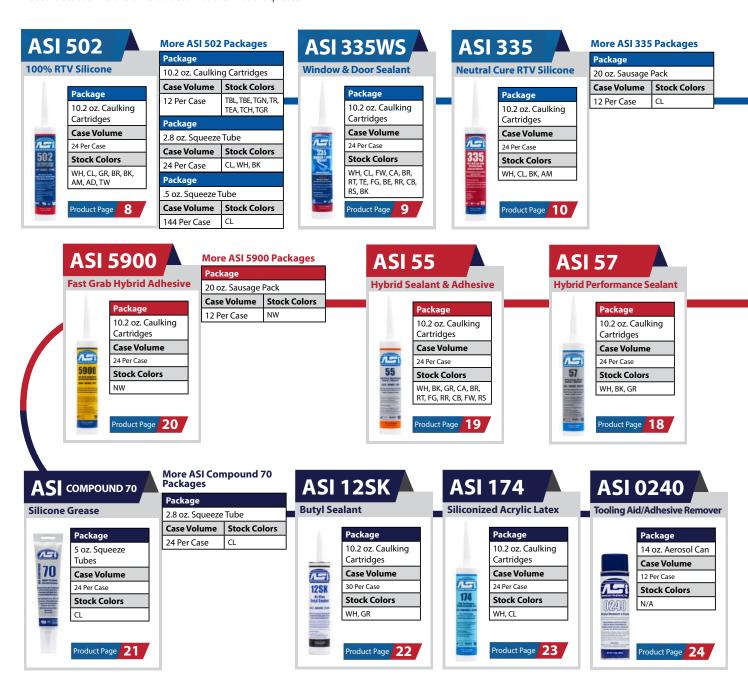

ASI PRODUCT CATALOG 2019 PAGE 6

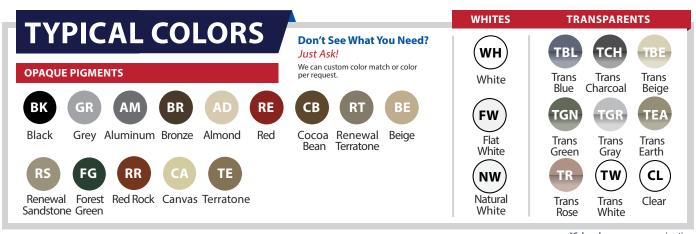

ASI® PRODUCT LINE STANDARD STOCK

ASI stocks standard packages and colors across the entire product line.

The below chart shows the standard offerings for each product that ASI always has in stock. However, we can easily produce any combination of listed typical colors & packagings for every product. Further, we encourage our customers to reach out to our team for unlisted needs because we are able to accomodate most requests.

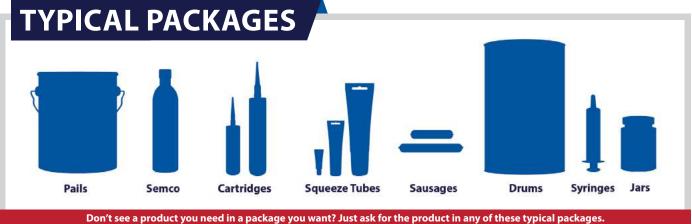

*Colors shown are an approximation.

Actual product color may vary. Samples are available by request.

ASI 502

100% RTV Silicone

Description

ASI 502 100% RTV Silicone is a one-component, moisture cure, acetoxy silicone that cures to form an extremely durable rubber that can withstand a variety of extreme environments.

Unlike many organic sealants, ASI 502 is extremely resistant to degradation, weathering, extreme temperatures and mold and mildew. ASI 502 meets the requirements of NSF Standard 51 and FDA Regulation No. 21 CFR 177.2600 for food grade applications. ASI 502 100% RTV Silicone can be applied to both vertical and overhead joints without sagging and is easy to extrude at both hot and cold temperatures. It will adhere to most common building materials.

Common Applications

- · Walk-In Freezer Manufacturing & Installation
- RV & Trailer Manufacturing
- Countertop Installation & Sealing
- Formed-In-Place Gasket Applications Marine Applications
- Bathroom Installation & Sealing
- · Industrial Manufacturing **Applications**
- HVAC Applications
- Fireplace Manufacturing
- · Sheet Metal Work & Sealing
- · General Sealing & Bonding

Common Substrates

Glass

Aluminum Ceramic

Granite Marble

Natural & Synthetic Fiber

Most Fiberglass

Most Painted Surfaces

Most Wood Types • Some Plastics

*For a complete list of applications & substrates or more product information, please contact us.

Physical Properties	Test Method	Result
Viscosity	ASI Test Method	902,000 cps (Spindle 7, 4 rpm)
Skin Formation Time	ASI Test Method	10 minutes (70°F, 50% RH)
Density	ASTM D1475	8.4 lbs./gal
Hardness	ASTM C661	25 (Shore A)
Extrusion Rate	ASI Test Method	365 g/min
Tensile Strength	ASTM D412	264 psi
Elongation at Break	ASTM D412	500%
Application Temperature	ASI Test Method	-35°F to 150°F
Gun Grade	ASI Test Method	Pass (Non-Slump)
QUV Testing	ASTM G154	Pass (10,000 hrs.)
Service Temperature	ASI Test Method	-50°F to 400°F
Typical Cure Rate	ASI Test Method	24 hrs. (1/8" bead)

Strength will start to develop immediately and continue increasing for 7 days after application. ASI recommends testing strength and adhesion on the 7th day. ASI 502 suggested application temperature range: -35°F to 150°F. ASI 502 can be used at temperatures higher than 400°F for intermittent periods. Testing should be done to confirm temperature requirements are met.

Information on this data sheet can change without notice and it is therefore not recommened that these figures be used in spec writing. If you have any questions contact manufacturer's sales and technical service department.

- TT-S-01543A
- TT-S-00230-C
- MIL-A-46106A
- NSF Standard 51
- FDA Regulation No. 21 CFR 177.2600
- **UL** Recognized
- VOC Compliant (23 grams/liter ASTM D2369)

ASI 335

Window & Door Sealant

Description

ASI 335 Window & Door Sealant is a single component, non-slump, moisture curing neutral cure oxime silicone that cures to form a tough, non-corrosive, flexible rubber with outstanding resistance to weather & UV degradation.

ASI 335 Window & Door Sealant offers excellent adhesion without primer to vinyl, glass, aluminum, brick and a variety of other substrates (see list on back of TDS). It will not shrink, crack or pull away from substrates during curing because it is 100% silicone with outstanding physical properties including 35% joint movement. ASI 335 Window & Door Sealant will be easy & consistent to dispense over a wide range of temperatures because it does not contain any solvents or water.

Common Applications

- Window Manufacturing & Assembly
- Window Installation
- Metal Roofing Installation
- Door Installation, Manufacturing & Assembly
- · Sliding Installation & Sealing
- Portable Housing & RV Applications
- · Glass Glazing
- · Construction Applications

Common Substrates

- Glass
- Concrete, Brick, Mortar (Porous Substances)
- Vinyl
- Most Metals (Including Uncoated)
- Most Wood Types, Cement Board & Fiber Board
- Aluminum
- Ceramic
- Most Fiberglass
- Most Painted Surfaces

*For a complete list of applications & substrates or more product information, please contact us.

Physical Properties	Test Method	Result
Viscosity	ASI Test Method	1,100,000 cps (Spindle 7, 4 rpm)

ASI 335

Neutral Cure RTV Silicone

Description

ASI 335 Neutral Cure RTV Silicone is a one-part, non-slump, moisture cure sealant/adhesive that cures to form a tough rubber with long-term flexibility and durability.

Due to the formulation, ASI 335 offers advanced adhesion to a variety of surfaces including porous substrates, vinyl, some plastics, fiberglass, metals, woods and more. ASI 335 emits a low odor which makes it ideal for confined work spaces or occupied areas. It is extremely resistant to UV degradation, yellowing, temperature extremes and most chemicals. It is a 100% RTV Silicone and will remain easy to dispense and tool even at cold temperatures. ASI 335 has excellent physical properties and will continue to perform long-term in a variety of applications.

Common Applications

- Walk-In Freezer Manufacturing & Installation
- RV & Trailer Manufacturing
- · Vinyl, Metal & Aluminum Siding & Roofing
- Fiberglass Waterproof Sealing

ASI 504

Multi-Purpose RTV Silicone

Description

ASI 504 Multi-Purpose Silicone can be used as both a sealant and adhesive for a variety of applications requiring a waterproof seal. It is a paste-like, one component acetoxy silicone that cures to form a durable solid rubber when exposed to moisture in the air.

ASI 504 will not sag or slump so it can be applied to both vertical and overhead substrates without sagging. It can be used on both interior or exterior applications because it has excellent resistance to weathering, UV degradation, yellowing, etc. ASI 504 will adhere to most metals, woods, porcelain, ceramic, fiberglass, glass, and a variety of substrates not listed.

Common Applications

ASI 600

Hi-Temp Resistant RTV Silicone

Description

ASI 600 Hi-Temp Resistant RTV Silicone is a one-component, moisture cure, 100% RTV silicone that cures to form an extremely durable rubber that can withstand extreme heat while maintaining its physical properties.

Due to the formulation, ASI 600 can resist constant temperatures up to 500°F and intermittent temperatures up to 600°F. ASI 600 meets the requirements of FDA Regulation No. 21 CFR 177.2600 for food grade applications. ASI 600 Hi-Temp Resistant RTV Silicone can be applied to both vertical and overhead joints without sagging and is easy to extrude at both hot and cold temperatures. It will adhere to most common building materials (see list on back of TDS).

ASI 388

Electronic Grade RTV Silicone

Description

ASI 388 Electronic Grade RTV Silicone is a one part, moisture cure sealant that cures to form a tough, durable, flexible rubber that is ideal for bonding, sealing, encapsulating and protecting electronic

Once cured, ASI 388 will withstand a constant temperature range of -70°F to 400°F and will resist some chemicals depending on duration, contact and the type of chemical. ASI 388 bonds to a wide variety of substrates which makes it ideal for protection against moisture and other external variables. ASI 388 exhibits consistent electrical properties even when subjected to environmental changes in temperature, humidity, etc., which makes it a good insulator for electronic components.

Common Applications

- Sealing Lead Wire Entries Waterproofing Electronics Component Mounting
- Adhesive Use Around Electronics Sealing Electronic Assemblies

ASI 306

Electronic Grade Self-Leveling Silicone

Description

ASI 306 Electronic Grade Self-Leveling Silicone is a one component, RTV (room temperature vulcanizing) product that can be used for encapsulating, coating and sealing.

No acetic acid or other corrosive by-products are generated during its cure which allows the ASI 306 to be used around sensitive metals and electronics. ASI 306 cures at room temperature to form a tough, high-modulus rubber. ASI 306 has excellent unprimed adhesion to a very wide range of substrates including metals (i.e. chrome), glass, most woods, ceramics and various plastics. ASI 306 will resist weathering, moisture, vibration, ozone, ultra-violet and temperature extremes. It will also resist various chemicals and oils depending on the chemical and duration of the contact.

Common Applications

• Encapsulating Electronics • Thin Section Potting • Horizontal Joint & Gap Filling • Coating

ASI Aquarium Sealant

Description

ASI Aquarium Silicone Sealant is a one-part, RTV Silicone. It cures into a durable, long-term rubber that is aquatic life safe.

Due to it's exceptional tensile, elongation and tear strength it has been used for decades by leading aquarium manufacturers in production use as well as repair. ASI Aquarium Sealant has excellent clarity and offers excellent primerless adhesion to glass. ASI Aquarium Sealant can be used in both saltwater and freshwater tanks to create a waterproof seal. Because it is a thick sealant, it can be applied to vertical and overhead applications without sagging or slumping.

Days Immersed In Water	Force Required To Separate	Failure Mode (Cohesive Optimal)
1	212 (psi)	Cohesive Failure (Excellent)
7	209 (psi)	Cohesive Failure (Excellent)
90	206 (psi)	Cohesive Failure (Excellent)
180	208 (psi)	Cohesive Failure (Excellent)
300	203 (psi)	Cohesive Failure (Excellent)

WATER IMMERSION STUDY: TYPICAL LAP SHEAR STRENGTH (ASTM C-961)

Physical Properties	Test Method	Result
Viscosity	ASI Test Method	700,000 cps (Spindle 7, 4 rpm)
Skin Formation Time	ASI Test Method	10 minutes (70°F, 50% RH)

ASI 505 Self-Leveling RTV Silicone

Description

ASI 505 Self-Leveling RTV Silicone is a one-component, moisture cure, flowable material designed for a variety of potting, coating, sealing and waterproofing applications.

Once applied, ASI 505 will begin skinning in 8 minutes and continue curing to form a flexible, durable rubber that bonds well to a wide variety of substrates. ASI 505 will resist a wide temperature range (-70°F to 400°F) and will not degrade when used in exterior applications or under water. It is extremely UV resistant and will not shrink, crack or dry out long-term. ASI 505 contains no solvents and is VOC compliant.

Common Applications

- · Sealing & Waterproofing Horizontal Joints
- Coating Assemblies
- RV & Manufactured Housing Applications

Common Substrates

Glass Granite Marble **Most Fiberglass**

Metal Ceramic Some Plastics

ASI 53JM

Structural Hybrid Sealant

Description

ASI 53JM Structural Hybrid Sealant is a one-part, moisture curing sealant/adhesive formulated to form a long-term durable rubber with outstanding physical properties including 35% joint movement & 500% plus elongation.

ASI 53JM can be used in extreme conditions and will even cure when moisture is present before & during curing. ASI 53JM has been designed to be extremely resistant to yellowing, weathering & UV degradation which makes it ideal as an exterior sealant. It can be used on overhead or vertical substrates without sagging. ASI 53JM offers excellent unprimed adhesion to a wide range of substrates where adhesion is generally difficult for other sealants. ASI 53JM is safe to use in confined and occupied areas because of its eco-friendly chemistry and low odor.

Common Applications

- Semi-Trailer Manufacturing
- RV & Trailer Manufacturing
- General Construction Applications
- Joint Sealant Applications
- · Roofing Applications
- Industrial Manufacturing Applications
- Window & Door Installation
- Weather Sealing Applications
- Masonry Applications

Common Substrates

- Glass PVC & Other Plastics
- Ceramic Aluminum & Galvanized Metal Fiberglass Kynar ® Coated Substrates
- Wood Marble & Granite
- EPDM Concrete, Brick, Mortar (Porous Substances)
- Porcelain EPS or Styrofoam Insulation

*For a complete list of applications & substrates or more product information, please contact us.

Physical Properties	Test Method	Result
Viscosity	ASI Test Method	1,042,000 cps (Spindle 7, 4 rpm)
Skin Formation Time	ASI Test Method	30 minutes (70°F, 50% RH)
Density	ASTM D1475	12.7 lbs./gal
Hardness	ASTM C661	22 (Shore A)
Modulus 100%	ASTM D412	0.41 MPa
Tensile Strength	ASTM D412	1.4 MPa
Elongation at Break	ASTM D412	560%
Lap Shear	ASTM D412	0.95 MPa
Gun Grade	ASI Test Method	Pass (Non-Slump)
QUV Testing	ASTM G154	Pass (10,000 hrs.)
Service Temperature	ASI Test Method	-50°F to 220°F
Cure In Depth After 7 Days	ASI Test Method	8mm (70°F, 50% RH)

Strength will start to develop immediately and continue increasing for 7 days after application. ASI recommends testing strength and adhesion on the 7th day. ASI 53 JM suggested application temperature range: 32°F to 150°F. ASI 53JM can be applied lower than 32°F. However it will slow down curing. In general, lower temperature & humidity will slow skin and cure times.

Information on this data sheet can change without notice and it is therefore not recommened that these figures be used in spec writing. If you have any questions contact manufacturer's sales and technical service department.

ASI 57

Hybrid Performance Sealant

Description

ASI 57 Hybrid Performance Sealant is a one-part, polyether sealant that uses ASI's innovative hybrid technology to produce a material that is ideal for a wide range of applications where a long-term, durable seal or bond is required. It bonds to a wide array of substrates with aggressive adhesion and resists UV degradation and weathering long-term.

ASI 57 can be applied to a variety of environments while remaining easy to apply and tool. It is also able to withstand moisture before complete cure which makes it ideal for damp and wet environments. ASI 57 is 100% solids and has a very low odor which makes it ideal for confined or occupied work spaces. ASI 57 is ideal for most industrial and construction applications because of its broad adhesion profile, characteristics & properties.

Common Applications

ASI 55

Hybrid Sealant & Adhesive

Description

ASI 55 Industrial & Construction Hybrid Sealant/Adhesive uses ASI's innovative hybrid technology to provide a one part, elastomeric sealant/adhesive that will perform in a variety of demanding environments and applications without degrading.

Unlike conventional polyurethanes and solvent based sealants/ adhesives, ASI 55 is 100% solids, doesn't shrink, doesn't contain harmful isocyanates and performs long-term without degrading, yellowing or chaulking. ASI 55 is made to perform in all environments and can be applied to wet substrates and will withstand immediate rainfall without worry. ASI 55 has been formulated with long-term direct sunlight in mind and will continue to provide excellent physical properties even through constant change of temperatures, substrate settling, vibration and movement to provide a water tight seal and a durable bond.

ASI 5900

Fast Grab Hybrid Adhesive

Description

ASI 5900 Fast Grab Hybrid Adhesive uses ASI's innovative hybrid technology to develop immediate green strength to fixture substrates while the adhesive cures and provides a long-term, durable bond. ASI 5900 is 100% solids.

It will not shrink and is free of isocyanates and solvents which make it easy and friendly to work with at a variety of temperatures. ASI 5900 will remain consistent to dispense and tool whether it is cold or hot outside unlike many solvent based adhesives. It will bond to wet substrates and is able to be applied when water or moisture is present without washing off (water based adhesives) or outgassing and bubbling (polyurethanes). ASI 5900 has a very broad adhesion range and can be used for a variety of industrial or construction applications.

Common Applications

- · Roof Bow Adhesive
- · Landscape Block Applications
- Trailer & RV Manufacturing Countertop & Solid Surface Installation
- Shower Panels & Installation Subfloor Adhesive
- · Wall Stone Applications
- · Roofing Applications
- HVAC Applications
- Mirror Installations
- General Construction Applications

Features

100% Solids, VOC Compliant

No Solvents Or Water, Will Not Shrink

Offers Immediate Green Strength

Adheres To A Wide Variety Of Substrates

Remains Easy To Dispense From 0-150°F

Will Cure To Wet Substrates Or When Moisture Is Present

Remains Flexible, Allows For Vibration & Movement

The ASI 5900 Advantage

Reduce Adhesive Usage

The solvent in solvent based adhesives flashes off during curing and water based adhesives also have water loss during cure. This can often leave behind just 60% of what you applied. With the ASI 5900, what you apply stays.

Where Eco-Friendly & Performance Meet

A lot of adhesives that are eco-friendly do not have the strength required for the job The ASI 5900 offers an eco-friendly option that is made to perform.

ASI Compound 70 Multi-Purpose Silicone Grease

Description

ASI Compound 70 Multi-Purpose Silicone Grease is a moisture resistant, non-curing paste which retains its consistency and properties over a temperature range of -70°F to 400°F.

This stiff, tacky compound is non-melting and retains its properties over extended periods of use. ASI Compound 70 has excellent dielectric properties and is highly water repellant and resistant to oxidation. ASI Compound 70 can be used as a release agent, lubricant, dielectric grease, water repellant, corrosion protectant and applications where resistance to thermal degradation or electrical insulation are needed. ASI Compound 70 is also NSF H1 registered for use around food processing areas.

ASI 12SK

Hi-Flex Butyl Sealant

Description

ASI 12SK Butyl Sealant is a one part, butyl based sealant that has been formulated to perform better than the average butyl by using synthetic fibers to allow more flexibility, better adhesion, and more versatility.

ASI 12SK provides a long-term seal between all types of masonry, steel, aluminum, glass and other common construction/industrial materials. ASI 12SK Butyl Sealant shows excellent resistant to weathering, bubbling, cracking, and other performance issues usually seen with butyl sealants. ASI 12SK conforms with the requirements of Federal Specification TT-S-01657. It is also paintable when using most industrial and commercial paints.

ASI 174

Siliconized Acrylic Latex

Description

ASI 174 Siliconized Acrylic Latex is a high performance, paintable sealant used for sealing interior and exterior joints.

ASI 174 Siliconized Acrylic Latex cures to form a strong, flexible water tight seal. ASI 174 is further modified with proprietary additives to optimize resistance to oxidation, UV degradation and cold temperatures. ASI 174 will also expand and contract with paint which allows it to be a painted using most latex and oil based paints.

ASI 0240

Tooling Aid & Adhesive Remover

Description

ASI 0240 is a multi-use, sprayable liquid that can be used when tooling sealants/caulk to make the process easier and create a professional, clean looking seal, faster. ASI 0240 also serves as a remover that helps remove all types of caulks, sealants, labels, tapes and other adhesive products without damaging most common substrates.

Features

Tooling Aid/Adhesive Remover

Safer & More Effective Than Most Solvents

Flashes Away Without Leaving A Residue

Can Be Used With Most Caulks & Sealants

Will Not Damage Most Substrates Unlike Solvents

More Effective Than Water When Used To Tool

Citrus Scent

Safe To Use On The Following Substrates

- Metals Glass Mirrors Most Wood Fiberglass Gel Coat Most Plastics Cultured Marble
- Solid Stone Surfaces Ceramic Porcelain Brick Concrete

Remove Adhesive & Sealants Safely & Effectively

ASI 0240 will effectively remove a wide variety of adhesive & sealant products including; hybrid polyethers, silicones, polyurethanes, caulks and pressure sensitive labels safely and effectively. When worked into and underneath the adhesive the ASI 0240 safely breaks the bond and allows for easy removal and clean up. It is safe to use on a variety of common substrates and will not harm surrounding adhesives if left alone and not worked into the adhesive. ASI 0240 is much more effective than most solvents including acetone and methyl ethyl keytone for removal of sealants and adhesives.

Use As A Tooling Aid For A More Efficient, Professional Looking Bead

After you apply the bead of caulk/sealant spray ASI 0240 on the bead. During tooling, it will keep the caulk from sticking to your finger and it also helps keep the caulk from adhering to areas outside of the bead area. This makes tooling easier, cleaner and less time consuming. The excess ASI 0240 will evaporate without leaving a residue or damaging most caulks and substrates unlike solvents.

Helps To Remove

- Polysulfide Sealants/Adhesives
- Silicone Sealants/Adhesives
- Polyurethane Sealants/Adhesives
- Polyether Sealants/Adhesives
- Solvent Based Sealants Adhesives
- Hybrid Sealants/Adhesives
- Butyl Sealants
- STPE Sealants/Adhesives
- Latex Caulks
- Lubricants
- Most Contact Adhesives
- Most Tapes
- Labels
- Decals

Helps To Tool

- Polysulfide Sealants/Adhesives Silicone Sealants/Adhesives Polyurethane Sealants/Adhesives Polyether Sealants/Adhesives STPE Sealants/Adhesives
- Hybrid Sealants/Adhesives
 Solvent Based Sealants/Adhesives
 Latex Caulks
