ICEtrekkers®

A quarter of a century ago, ICEtrekker's founders, producers of high end tire chains, came across a clever product used by walkers to navigate steep icy hills during the winter. It occurred to them that this concept could be improved upon, so they put their collective expertise together and began developing a line of personal traction devices based on the same principles used for vehicle traction: chains, studs and cables. Today, ICEtrekkers devices provide heavy-duty, comfortable traction to keep you working safely in any winter weather. The line offers a variety of styles to choose from in order to suit your needs.

ICEtrekkers Diamond Grip features an innovative Diamond Bead design which provides aggressive traction for all winter working conditions, from boilerplate ice to backcountry snow and everything in between. Great for users that have to transition from bare concrete, gravel and mud to snow and ice-covered surfaces. Diamond Grips are self clearing, so there is no snow or ice buildup.

ICEtrekkers CHAINS

2001 T.W. Alexander Drive, Box 13925
 Durham, North Carolina 27709
 800.446.7587 • help@implus.com

ICetrekks Chains are like tire chains on a car: perfect for all snow conditions, including packed icy surfaces. The durable links are individually welded and made from case-hardened steel. The unique ladder pattern under the ball of the foot, combined with the triangular pattern on the heel, provides stable footing and is comfortable for extended wear.

ICEtrekkers SPIKES

2001 T.W. Alexander Drive, Box 13925
 Durham, North Carolina 27709
 800.446.7587 • help@implus.com

ICEtrekkers Spikes are excellent for navigating icy streets, parking lots and driveways. They can be used with a variety of footwear. ICEtrekkers Spikes have 7-point contact under the ball and heel of the foot, providing grip even in glare ice conditions. Our replaceable spikes are made with tungsten carbide – the same tough steel used in high speed router bits – and are encased in an alloy steel housing. This model is lightweight and easy to stow and works on all types of footwear, making it great for city use.

YAKTRAX are the simplest, most effective winter traction device for walking and working on packed snow and ice. Named after the sure-footed Tibetan Yak, these traction devices stretch over most types of footwear – including boots – and will keep you safe and upright in spite of the elements. With various models, there is a Yaktrax device for anyone in any outdoor environment. Yaktrax provides winter traction for all you do.

WINTERTRAX®

by YAKTRAX®

Spikeless > Ultralight > Easy To Use

Wintertrax will give you instant confidence on packed snow and ice. You will feel the same solid predictable grip you are accustomed to on dry surfaces. Wintertrax are made of a durable polyelastomer material that easily stretches over shoes or boots. The high-abrasion steel coils will give you hundreds of biting edges on packed snow and ice. The unique patented design provides 360° of traction giving you security from side-to-side and front-to-back. Wintertrax are easy to use and can fit in a coat pocket or purse. Walk safely this winter across sidewalks, driveways, parking lots or anywhere you can benefit from having greater stability on snow and ice.

what's in it?

- Iron Powder
- Water
- Salt
- Activated Charcoal
- Vermiculite

www.littlehottieswarmers.com

ANATOMY OF A WARMER

how does it work?

- When exposed to oxygen, the iron in the pouch oxidizes and produces heat.
- When iron oxidizes, it produces iron oxide— more commonly known as rust.
- The salt acts as a catalyst, while the carbon helps disperse the heat.
- The vermiculite is used as an insulator for the purpose of retaining the heat.
- All of these ingredients are enclosed in a polypropylene bag.
- Polypropylene allows air to permeate the ingredients while holding in moisture.
