flap disc video

Weldcote Metals was founded in 2006 by Bill Roland and John Pandorf, two industry veterans with more than 65 years of experience. The reason? They wanted to bring flexibility, adaptability, customer service and innovative thinking to an industry dominated by well-established, but slow-to-react giants. Much like a craft brewer in a market dominated by huge breweries, the idea was not to compete, but to supplement and expand the offerings these “titans” couldn’t or wouldn’t offer.

In 2018, the success of this model was proven with the investment in Weldcote by Zika Group Ltd. An international company specializing in high-quality welding consumables, it adds proven technical expertise, increased capital and a global reach.

With the end goal of becoming your one-stop-shop solution for industrial tools, Weldcote plans to continue to add to the products in this catalog. We hope that when it comes to welding, metalworking and finishing tools, including USA Made **flap discs, cutting and grinding wheels and a comprehensive line of coated abrasives**, that you will contact Weldcote first.

TABLE OF CONTENTS

FLAP DISC	4-21
USA Made Premium Trimmable Flap Discs (Ceramic, Zirconia)	6-7
USA MADE C-PRIME PLUS Ceramic Flap Discs - Phenolic Back	8
USA MADE C-PRIME Ceramic Flap Discs - Phenolic Back	9
USA MADE Z-PRIME Premium Zirconia Flap Discs - Phenolic Back	10
USA MADE Z-SOLID Zirconia Flap Discs	14
USA MADE A-PRIME Premium Aluminum Oxide Flap Discs	16
USA MADE ALU-PRIME Premium Flap Discs for Aluminum	17
KORNER Premium Ceramic & Zirconia Flap Discs	18
KORNER 2 - 3" Premium Flap Discs & Holder Pads	19
2 - 3" Premium Flap Discs	20
Rubber Holder Pads for 2 - 3" Flap Discs & Weldcote Surface Conditioning Flap Discs	21
RESIN FIBRE DISCS	22-25
RESIN FIBRE DISCS - Premium Ceramic	22
RESIN FIBRE DISCS - Premium Aluminum Oxide & Z-PRIME	23-24
Quick Lock Resin Fibre Discs	24
A-SOLID Aluminum Oxide & Z-SOLID Zirconia Resin Fibre Discs	25
ACCESSORIES	26-27
Rubber & Plastic Back-up Pads, Accessories, Right Angle Grinders	26
Rubber Holder Pads for 1-1/2 - 4" Discs Quick Change Discs	27
QUICK CHANGE DISCS	28-33
2 - 4" Quick Change Discs - Surface Conditioning Roll On, A-PRIME, S/C-PRIME & C-PRIME	28
2 - 3" Quick Change Discs - Turn On Non Woven, Aluminum Oxide, A-PRIME	29
2 - 3" Quick Change Discs, Coated Roll On - Ceramic, C-PRIME PLUS & ZAG-PRIME	30
2 - 3" Quick Change Discs, Coated Roll On - Zirconia, Z-PRIME & Aluminum Oxide, A-PRIME	31
2 - 3" Quick Change Discs, Coated Turn On - Ceramic, C-PRIME PLUS & Zirconia w/ Grinding Aid	32
2 - 3" Quick Change Discs, Coated Turn On - Zirconia, Z-PRIME & Aluminum Oxide, A-PRIME	33
FLAP WHEELS	34-39
Long Life & Premium Cut Aluminum Oxide Flap Wheels, A-PRIME	34-37
Premium Cut Unmounted Aluminum Oxide Flap Wheels, A-PRIME	38
Shop Rolls, Aluminum Oxide, A-PRIME	39
SURFACE CONDITIONING	40-43
UNITIZED Right Angle Grinder Wheels & UNITIZED Wheels – Quick Change, Roll-On	40
Surface Conditioning Discs & Surface Conditioning Discs, Roll On	41
STRIPIT Wheels Right Angle Grinders – Surface Conditioning	42
STRIPIT Quick Change Discs – Surface Conditioning, Roll-On	42
Surface Conditioning Discs, with Hole & Premium Non-Woven Industrial Hand Pads	43
RESIN BONDED ABRASIVES	44-55
Right Angle Grinder Wheels, Cutting - SLITTER, A-PRIME PLUS & SLITTER INOX-PRIME PLUS	45
Right Angle Grinder Wheels, Cutting - SLITTER, A-SOLID & SLITTER, INOX-PRIME	46
Right Angle Grinder Wheels, Cutting - SLITTER, A-PRIME & SLITTER, ALU-PRIME	47
Right Angle Grinder Wheels, Cutting - SLITTER, Z-PRIME & Multi-Purpose Wheel, INOX-SOLID	48
Right Angle Grinder Wheels, Cutting - SLITTER or NOTCH & PIPELINE or NOTCH	50-51
Right Angle Grinder Wheels, Grinding, PRIME & SOLID	52-53
Abrasive Cut-Off Wheels for Die Grinders, Type 1 & Die Grinder Cut Off Wheels, A-SOLID	54
Circular Saw Blade Cut-Off Wheels, A-SOLID & Cut Off Wheels, A-SOLID	55
RESIN CONES, PLUGS & RESIN CUP WHEELS	56-57
Resin Cones & Plugs	56
Resin Cup Wheels	57

Bonding + Backing System

POLY COTTON

C-Prime Plus, Z-Prime, Z-Solid, A-Prime – all were developed for flap disc applications to with stand the high pressure created while a right-angle grinder is operating. The poly-cotton cloth is designed to provide increased grain retention and still provide flexibility vs. polyester backings.

POLYESTER

C-Prime, Alu-Prime, offer water resistant polyester backing which provides great strength but less flexibility.

Trimable Discs

Backing Plate

FIBERGLASS / PHENOLIC

TRIMMABLE

- a. Backing Plate offers excellent flexibility during course of operation.
- b. Nylon 6 backing can be trimmed back during course of operation
- c. These features allow for up to a 65% increase in the operating life of each disc.

Design Shape

T27

Flat – for working on flat or overhead grinding surfaces

T29

Conical – for working on contoured and edge work the shape allows for excellent surface conduct and aggressive use.

COMPRESSED

The compressed shape was developed with input from large users around the world and leads to increased product life and a substantial reduction in inventory costs for the entire market channel. T27 backing turns to T29 product.

Weldcote Dual Label

Large movers may have a baked-on label with two UPC item numbers. The left side will highlight a 7/8" arbor and the right side will highlight a 5/8 – 11 Arbor hole.

Why Flap discs vs. Grinding Wheels or Resin Fiber Discs

- Flap discs offer up to 5X stock removal, less gouging of the work piece easier to control for better work piece quality less changeover = less downtime, less glazing, loading and workpiece discoloration.
- Vast improvement in metal removal over a period of time.

FLAP DISC

MATERIAL PRODUCT OFFERING

C-PRIME PLUS

NEW

Poly-cotton backing with high end ceramic grain provides excellent stretch and flexibility yet enough strength to maximize the aggressive cutting points of ceramic grain.

C-PRIME

Strong Polyester backing for aggressive grinding applications that don't require excessive flexibility.

Z-PRIME

TOP SELLER

Poly-cotton zirconia with closed coating and high zirconia density provides unmatched metal removal capabilities vs. all zirconia grain products on the marketplace. Built-in grinding agent allows product to perform in multiple applications in the marketplace.

Z-SOLID

Poly-cotton Zirconia with closed coat and high Zirconia/AO coating density for excellent metal removal rates. Long lasting chemically treated Zirconia grains allows for excellent results on metal, stainless steel, edge weld removal and deburring. High value/price performance in the marketplace.

A-PRIME

Poly-cotton Aluminum Oxide with closed coating and high Aluminum Oxide density provides excellent metal removal capabilities and excellent flexibility. AO Grain will not burn the material. Excellent on soft metals and hard woods.

ALU-PRIME

Polyester blue fired Aluminum Oxide grain with a second tier of calcium stearate laid on top of the Aluminum Oxide polyester heat-treated backing. The second tier calcium stearate reduces material build up between grains. During the grinding operation this liquefies to keep the material cooler and prevents loading with Aluminum and other such metals.

Ceramic

#1 Selling Material Grain sold in the Flap disc marketplace

Aluminum Oxide

Aluminum

USA Made Premium Trimmable Flap Discs with Built-in-Hub

#1 Performer

- Trimming the backing plate (see page 4) on a continual basis allows the operator to use the disc for a longer period of time and increases disc life by up to **65%**.
- **C-PRIME PLUS** trimmable with built in hub has **10-15%** more material than C-PRIME phenolic.

USA MADE Z-PRIME Premium Zirconia Flap Discs - Phenolic Back

#1 Zirconia in the World

- Z-PRIME Zirconia technology provides the fastest metal removal of any Zirconia based grain in the market.
- Z-PRIME provides cool cutting with a built in grinding aid and is recommended for aggressive use and heavy duty applications.
- Z-PRIME is manufactured with active grinding agent that provides cool cutting with light pressure. Excellent on carbon based steels and on stainless steels.

USA MADE Z-PRIME Zirconia **TOUGH EDGE** Flap Discs - Phenolic Back

- Weldcote Tough Edge Flap Discs are a hybrid between Regular and XL in terms of volume of material.
- The Tough Edge provides the optimal amount of flap disc material.
- Tough Edge product is a T27 product that is compressed to offer a 4% degree grinding angle.

USA MADE A-PRIME Premium Aluminum Oxide Flap Discs

- High quality blue fired Aluminum Oxide grain with a flap disc friendly poly-cotton design. The active grinding agent provides cool cutting on all applications.
- Aluminum Oxide grain is excellent on soft metals, non-ferrous metals (aluminum, brass, copper, zinc) as well on composites and wood.

USA MADE ALU-PRIME Premium Flap Discs for Aluminum

- High quality Aluminum Oxide grain with a tough polyester heat treated backing.
- 2nd tier calcium stearate reduces material build up between grains. This product design allows the end user to keep the material cooler and helps prevent loading with Aluminum, non-ferrous metals and blending stainless steel.

RESIN FIBRE DISCS

RESIN FIBRE DISCS - Premium Ceramic

- **C-PRIME PLUS** offers improvement in abrasive grain manufacturing technology that results in a much finer crystallized structure. The unique mineral structure provides resin fibre discs with longer life and more aggressive grains in addition to improved self-sharpening features compared to traditional ceramic products.
- New Ceramic grain improvements include a higher metal removal rate at faster cutting speeds with a low grinding temperature and less friction.
- **C-PRIME** ceramic resin fibre discs offered with a top sized grinding aid. This design feature keeps the disc cool while grinding hard materials as well as Aluminum.
- Ceramic grain breaks down with much less pressure than Zirconia discs and thus reduce heat damage.

RESIN FIBRE DISCS - Premium

Aluminum Oxide

- **A-PRIME** is designed with heavy duty vulcanized fibre backing for extended disc life. This provides a dramatic reduction in product curling.
- **A-PRIME Top Size** grinding aid built on top of Aluminum oxide grain for cooler cutting and longer life. Reduces clogging and burning.

Z-PRIME Premium Resin Fibre Discs

- Z-PRIME is designed with heavy duty vulcanized fibre backing for extended disc life. This provides a dramatic reduction in product curling.
- Z-PRIME is designed with self-sharpening effect that constantly produces new sharp edges and thus enables a much better grinding performance.
- Quick lock discs available in additional sizes and grits. Contact Weldcote Customer service for details.

Z-SOLID Zirconia Resin Fibre Discs

- **Z-SOLID** has high concentration of Zirconia grain as well as heat treated Aluminum Oxide grain. Z-SOLID grain will achieve twice the cutting action of other premium AO discs.
- Zirconia grain is sharper and the grain breaks down over a longer period of time and thus far superior results can be achieved compared to AO grains.
- Z-SOLID provides high metal removal and is excellent on stainless steel, Inconel, titanium and tool steel.

RUBBER & PLASTIC BACK-UP PADS, ACCESSORIES

- USA Made Rubber back-up pads contain spiral ribs to provide contact points and form channels for airflow, extending disc life up to 50%.
- Enhanced mechanical and chemical bond between rubber and metal provides increased airflow and higher RPM ratings.
- Flexible Rubber pads are recommended for contours and Rigid pads will last longer on aggressive grinding applications.

2 - 3" Quick Change Discs, Coated Roll On - Ceramic, C-PRIME PLUS

- C-PRIME PLUS offers improvement in abrasive grain manufacturing technology that results in a much finer crystalized structure. The unique mineral structure provides QUICK CHANGE DISCS with longer life and more aggressive grains in addition to improved self-sharpening features compared to traditional ceramic products.
- New Ceramic grain improvements include a higher metal removal rate at faster cutting speeds with a low grinding temperature and less friction.
- Products designed in the USA, laminated in the USA, die cut and spin weld in the USA.

2 - 3" Quick Change Discs, Coated Turn On - Ceramic, C-PRIME PLUS

- **C-PRIME PLUS** offers improvement in abrasive grain manufacturing technology that results in a much finer crystalized structure. The unique mineral structure provides QUICK CHANGE DISCS with longer life and more aggressive grains in addition to improved self-sharpening features compared to traditional ceramic products.
- New Ceramic grain improvements include a higher metal removal rate at faster cutting speeds with a low grinding temperature and less friction.
- Products designed in the USA, laminated in the USA, die cut and spin weld in the USA.

FLAP WHEELS

Long Life Aluminum Oxide Flap Wheels, 1/4" Shank, A-PRIME

TOP SELLING MATERIAL

- A-PRIME is a NEW exclusive material on the marketplace. Breakthrough design offers aggressive cut rate combined with long life.
- A-PRIME Long-life flap wheels provide excellent product to work in small, difficult to reach places.
- The product is packed in a 10-piece box and a master shrink wrap of 50.

Premium Cut Flap Wheels, Aluminum Oxide, 1/4" Shank, A-PRIME

- A-PRIME Premium Cut is the top selling flap wheel material in the world. It's a flexible X-weight material with a premium initial cut rate.
- Flexible flaps that excel on working on hard to reach areas. Superb for finish-sanding of small wood or metal contoured parts, in or around radii or into holes.
- Use on stainless steel, steel, alloyed steel, non-ferrous metals, aluminum, titanium and glass.

SURFACE CONDITIONING

UNITIZED Right Angle Grinder Wheels

- Unitized discs are comprised of non woven material impregnated with resin and compressed for finishing on metals, Aluminum, Stainless Steel, titanium and composite materials.
- 2 / S / FINE: Silicon Carbide - Ideal on heat sensitive materials.
- 2 / A / MEDIUM: Aluminum Oxide - Ideal for deburring, finishing & polishing on all metals.
- 3 / S / FINE: Silicon Carbide - Ideal on all metal materials.
- 6 / A / MEDIUM: Aluminum Oxide - Ideal for deburring, finishing & polishing on all metals.

RESIN BONDED ABRASIVES

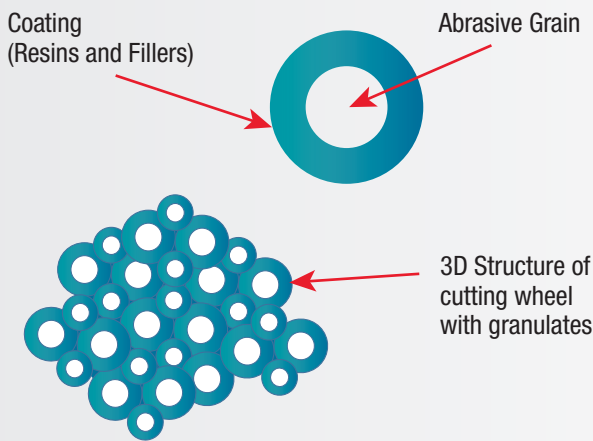

SLITTER, A-PRIME PLUS and INOX-PRIME PLUS Right Angle

NEW R & D / MANUFACTURING TECHNOLOGY

Granulation Process (Coating Method)

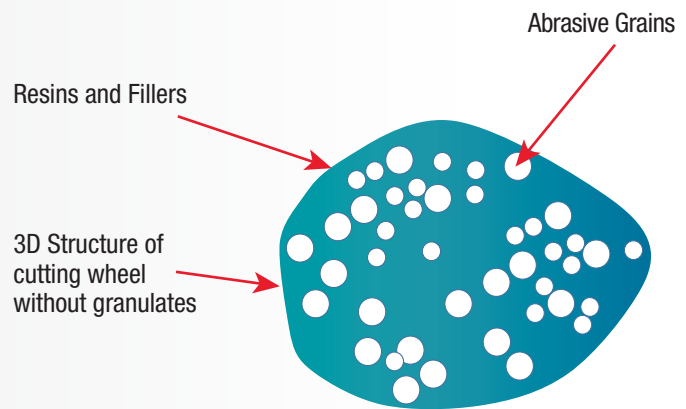

Mixing + „Coating“ of grains = Granulates

Even distribution of abrasive grains due to granulates = consistent performance throughout the life of the wheel

Standard Mixing Process

Mixing of grains, resins and fillers = Mixture (Powder)

Uneven distribution of abrasive grains within the powder = uneven performance

Granulation Process Technology

- Multi-step, more complex manufacturing process in comparison to the conventional process of grains – resins – fillers.
- Granulation – coat each abrasive grain with resins and fillers.
- Granulated particles have a defined size (too large and too small are eliminated by sieving). Achievement – very homogeneous distribution of the abrasive grain within the resin wheel.

Extended Life Performance Technology

- Resin bonded wheels from all manufacturer's are organic and the product quality drops over time. Our PRIME-PLUS wheels have a new formula that delays the ageing process by approximately 6 months.
- Unique patented chemical additive to enhance performance.
- In addition, these wheels offer a high performance.
- A-PRIME PLUS wheels are developed for High Power machines.

High Power Machines

Size	AMPS	Watts
4-1/2"	8	1,000
5"	10	1,200
6"	12	1,400
7"	17	2,000

Right Angle Grinder Wheels, Cutting - SLITTER, A-PRIME PLUS

- **A-PRIME PLUS:** High-end German manufacturing technology.
- Low burr, reduced sparks.
- Excellent for high power machines. Suitable for low power machines.
- 10713 made in Italy*.

Right Angle Grinder Wheels, Cutting - SLITTER INOX-PRIME PLUS

- **INOX-PRIME PLUS** has new breakthrough technology. The resin wheels are compressed while curing in the oven/kiln. The result is a denser, more stable and high performing wheel. The compressed technology has an approximate 20% higher density in comparison to a standard resin wheel.
- INOX-PRIME PLUS can cut steel and stainless, are contaminate free thin cutting wheels.
- Excellent average cutting speeds per cut with a minimal burr, smoother finish and long life.
- Excellent for high power machines.

Right Angle Grinder Wheels, Cutting - SLITTER, A-SOLID

- **A-SOLID** is a White Aluminum Oxide wheel that offers a fast, smooth cut with minimal burr. The A-SOLID offers an amazing overall value of performance and price.
- The WA grain is contaminant free and can cut steel and stainless and can be used in aeronautic, nuclear and food industry applications.

Right Angle Grinder Wheels, Cutting - SLITTER, INOX-PRIME

- **INOX-PRIME** can cut steel and stainless, are contaminate free thin cutting wheel (SLITTER) that is designed for the specialist operator and is intended for the most demanding users. The free cutting white aluminum oxide grain will excel in aeronautic, nuclear and food industry applications.

Right Angle Grinder Wheels, Cutting - SLITTER, A-PRIME

- **A-PRIME** is the new Aluminum Oxide line of thin abrasive wheels (SLITTER) developed for the steel applications that is the number one application in North America. A-PRIME will cut stainless steel but excels in steel applications.
- A-PRIME Type 1 (flat) is available in 2-wheel thickness and offered in Type 27 (depressed) shapes which can also receive a 5/8-11 hub.
- The Type 1 A-60-R-BF is a thinner wheel designed to offer more flexibility and excellent for thinner cuts and easy work penetration.

Right Angle Grinder Wheels, Cutting - SLITTER, Z-PRIME COMBO

- The **Z-PRIME** in 3/32 is a 3-in-1 wheel (cutting, grinding and finishing) that is excellent on steel or stainless steel.
- The Z-PRIME PLUS 3-1 abrasive formulation allows keeping a low working temperature which guarantees a good finishing material.

Multi-Purpose Wheel - Cut, Grind, Finish, INOX-SOLID

- **Multi-Purpose INOX-SOLID** wheels is designed for cut, grind finish applications and is made with White Aluminum oxide and is Contaminant free.
- The waffle pattern provides cooler grinding and the product can be used on steel, stainless steel, Aluminum and non-ferrous metals.

Right Angle Grinder Wheels, Cutting - SLITTER or NOTCH

- INOX-PRIME wheel is made with White Aluminum Oxide and is a pure cutting (SLITTER) wheel. The 3/32" is offered for applications where a thin wheel is not required or not the right fit for the application. The thicker wheel will provide longer life. Use the 1/8" below for notching.
- The WA grain is contaminant free and can cut steel and stainless and can be used in aeronautic, nuclear and food industry applications.
- INOX-PRIME NOTCH wheel a .125" wheel that is used for cutting and notching applications. The INOX-PRIME is produced with White Aluminum oxide grain and is contaminant free and can cut steel and stainless and can be used in aeronautic, nuclear and food industry applications as well as steel applications.

Right Angle Grinder Wheels, Cutting - PIPELINE or NOTCH

- A-SOLID NOTCH wheel is a Q hardness wheel designed for fast cutting of general steel and general use applications including many pipeline applications.
- A-SOLID PIPELINE wheel is actually 5/32" thick (4mm) and is designed for cutting and light grinding as well a pipeline applications such a pipeline root pass, weld and flame grinding.

Right Angle Grinder Wheels, Grinding, PRIME

- **A-PRIME** Grinding wheels are made with premium heat-treated Aluminum oxide grains and advanced bonding technology for excellent cut rate and extended life. The A-PRIME uses the most popular A24-R bond grade.
- **INOX-PRIME** grinding wheels are made with friable white Aluminum oxide grains. The WA grain is made with a S-Grade and is contaminant free and can cut steel and stainless and can be used in aeronautic, nuclear and food industry applications.
- **ALU-PRIME** grinding wheels are made with special grains and bonds and are classified as C-24-P wheels. The soft grade allows for use in Aluminum, copper, zinc and other soft metals.

Right Angle Grinder Wheels, Grinding, **SOLID**

- **A-SOLID** Grinding wheels are available in A-24-N Bond. This is a soft bond for fast stock removal. It has an excellent g-ratio which is grams of metal removed / grams of wheel life consumed. Great choice for hard metals and low-grade stainless steel.
- A-SOLID grinding wheels are available in A-24-R Bond. This is a harder bond for longer life.
- A-SOLID is available in A-24-R for T28 wheels (see bottom of page).

Abrasive Cut-Off Wheels for Die Grinders, Type 1

- Z-PRIME discs offer high percentage of tougher, sharper Zirconia grain for faster cutting and longer life.
- Excellent on steel and stainless steel.

11102

Type 1

- Aluminum Oxide grain offers great value for metal, steel and general applications.
